Goal, Objectives, Targets, and Milestones

Goal

- Broad and aspirational
- “I want to lose weight and become healthy”

Objective

- Defines a measurable endpoint and the direction of change
- “I plan to weigh below the average in my age group”

Targets

- Implies a numerical aspiration
- “I want to lose 10 kg by the end of 2018”

Milestones

- Guide your progress towards targets.
- “I plan to lose 5 kg by June 2018”

Difference Between Goals and Objectives

Goals vs Objectives

When you have something you want to accomplish, it is important to set both goals and objectives. Once you learn the difference between goals and objectives, you will realize that how important it is that you have both of them. Goals without objectives can never be accomplished while objectives without goals will never get you to where you want to be. The two concepts are separate but related and will help you to be who you

want to be.

Definition of Goals and Objectives

Goals “are long-term aims that you want to accomplish.

Objectives “are concrete attainments that can be achieved by following a certain number of steps.

Goals and objectives are often used interchangeably, but the main difference comes in their level of concreteness. Objectives are very concrete, whereas goals are less structured.
