Hiroshima Shudo University and UNITAR
Finalize an Agreement towards Reconstructing Countries in Conflict

Hiroshima Shudo University signed an agreement on the 30 March with UNITAR to cooperate with conflict reconstruction.

University President Taichi Ichikawa and UNITAR Executive Director Carlos Lopes signed the agreement in a ceremony. ED Lopes emphasized that “we want to develop even further human resource capabilities, especially in emerging countries.” President Ichikawa added “hopefully we can aide in providing a high level of international education.”

When UNITAR begins to accept Iraqi fellows for reconstruction training they will meet with Shudo University professors. Activities like university students doing internships at the UNITAR Hiroshima Office are also assumed to take place.

ED Lopes also gave a lecture on “The Challenges of Multilaterism.” He stated that “it is important to confront the fact that [this issue] crosses national borders,” given that the general public is targeted in conflict-stricken regions.

Before the signing ceremony ED Lopes, along with Hiroshima Mayor Matsui, planted an A-bomb tree sapling along Peace Boulevard for the Green Legacy Hiroshima.
