

CIFAL Global Network Training Catalogue 2026

Message from the Executive Director

Being now at the mindpoint of the Decade of Action to Accelerate Progress Towards Achieving the Sustainable Development Goals (SDGs) by 2030, the importance of investing in knowledge, learning, and capacity-building continues to grow. Around the world, communities and institutions are navigating unprecedented challenges. In this context, equipping people with the skills, tools, and confidence to lead change is not only necessary—it is essential. We are seeing extraordinary opportunities to accelerate progress through innovation, inclusive governance, and renewed global cooperation.

At UNITAR, we believe that learning is one of the most powerful drivers of sustainable development. It strengthens institutions, shapes effective policy, and enables inclusive solutions that respond to real needs on the ground. Training is not simply about technical expertise—it is also about building trust, fostering innovation, and nurturing leadership that is responsive, compassionate, and forward-looking.

The CIFAL Global Network plays a key role in bringing this vision to life. By focusing on local capacity development, CIFAL Centres support communities and institutions in translating the Sustainable Development Goals into concrete action. Their work is rooted in the understanding that lasting impact must begin at the local level—where policies are implemented, services delivered, and lives transformed.

Through focused training, inclusive dialogue, and knowledge-sharing, CIFAL Centres empower local actors to design and implement solutions that reflect their communities' evolving priorities. Grounded in local realities, they contribute to stronger institutions, greater resilience, and the global momentum needed to advance the SDGs. As countries accelerate efforts in these final five years to the 2030 Agenda and global frameworks like the Pact for the Future, embracing new skills fit for the task, capacity-building remains essential to prepare for emerging challenges, aided by inclusive, data-informed, and transformative change.

I commend the continued commitment and creativity of the CIFAL Centres and their teams, whose work has touched thousands of lives over the past two decades. UNITAR is proud to partner with the members of the CIFAL Global Network in building the capacities that will shape a more sustainable, peaceful, and resilient future for all.

I invite you to explore this catalogue as a reflection of the diversity, creativity, and commitment of the CIFAL Global Network. Whether you are a policymaker, practitioner, student, or engaged citizen, I hope you find in these pages opportunities that inspire meaningful learning and spark new ways to contribute to a more just, inclusive, and sustainable world.

Michelle Gyles-McDonnough

United Nations Assistant Secretary-General
UNITAR Executive Director

Message from the Head of the CIFAL Global Network

It is my pleasure to present the 2026 CIFAL Global Network Training Catalogue, which reflects the collective commitment of CIFAL Centres worldwide to advancing knowledge, strengthening capacities, and supporting the implementation of global agendas at the local level. This catalogue offers a comprehensive overview of the training activities planned across the Network for the year ahead, showcasing the diversity, reach, and impact of CIFAL's work.

Building on the strong foundations of previous years, the 2026 programme brings together a wide range of learning initiatives across more than 30 Centres, addressing key thematic areas such as climate action, sustainable urban development, health and well-being, gender equality, youth empowerment, and economic development. These activities demonstrate the continued relevance of the CIFAL model in fostering localized solutions to global challenges through inclusive, practical, and action-oriented learning.

The 2026 Training Catalogue also reflects our ongoing efforts to strengthen the quality, coherence, and strategic alignment of the Network. Through enhanced planning processes, closer coordination with Centres, and the continued integration of UNITAR's strategic priorities, we aim to ensure that CIFAL activities contribute meaningfully to emerging global frameworks, including the Pact for the Future, UN 2.0, and the broader UN80 Initiative.

As the United Nations continues to navigate an increasingly complex global landscape, the role of local actors and decentralized learning platforms has never been more critical. CIFAL Centres remain at the forefront of this effort, translating global commitments into tangible actions that respond to local needs and realities.

I would like to express my sincere appreciation to all CIFAL Directors and their teams for their dedication in designing and delivering impactful training initiatives, as well as to my colleagues at UNITAR for their continued support in coordinating and strengthening the Network. The richness of this catalogue is a direct reflection of your expertise, collaboration, and commitment.

I invite you to explore the 2026 Training Catalogue and to engage with the diverse opportunities it offers for learning, partnership, and knowledge exchange. Together, we will continue to advance sustainable development through capacity-building and innovation at the local level.

Alex Mejia

Director, Division for People and Social Development
Head, CIFAL Global Network
UNITAR

About UNITAR

The United Nations Institute for Training and Research (UNITAR) an autonomous UN body established in 1963, the United Nations Institute for Training and Research (UNITAR) is a dedicated training arm of the United Nations System, and has the mandate to enhance the effectiveness of the UN through diplomatic training, and to increase the impact of national actions through public awareness-raising, education and training of public policy officials, with special attention to Least Developed Countries.

“By focusing on local capacity development, CIFAL Centres support communities and institutions in translating the Sustainable Development Goals into concrete action. Their work is rooted in the understanding that lasting impact must begin at the local level—where policies are implemented, services delivered, and lives transformed”.

In 2025, UNITAR reached 559,083 beneficiaries through its training and capacity-building activities.

About the CIFAL Global Network

The CIFAL Global Network, coordinated by UNITAR, is composed of **30 International Training Centres** for Authorities and Leaders hosted by local institutions worldwide. Its mission is to strengthen the capacities of individuals and organizations—particularly at the local and regional levels—to advance sustainable development.

CIFAL Centres offer training, capacity-building, and knowledge-sharing activities aligned with the Sustainable Development Goals (SDGs), focusing on *Sustainability Learning, Public Policy & Governance, Management, Peace & Security, Environment & Climate Change, Human Development, Infrastructure Development, Technology & Innovation*. They deliver in-person and online learning and serve as platforms for dialogue and policy implementation support.

In 2025, the CIFAL Global Network trained 162,246 beneficiaries, accounting for 28% of UNITAR's overall beneficiary reach. This reflects the Network's strong and growing contribution to UNITAR's global impact.

The CIFAL Global Network at a Glance

The CIFAL Global Network trained **162,246 beneficiaries** from around the world. In 2025, the CIFAL Global Network made significant progress in strengthening its governance, refining its strategic direction, and consolidating its global training footprint. Throughout the year, UNITAR led extensive coordination, monitoring, and performance analysis processes to ensure that the Network remained aligned with evolving United Nations priorities, the forthcoming UNITAR Strategic Framework 2026–2029, and the needs of more than 30 CIFAL Centres worldwide. This process enabled the continuous improvement of policies, frameworks, tools, and guidance documents, reinforcing the Network's capacity to deliver high-quality, locally relevant, and SDG-aligned learning solutions.

A strong emphasis was placed on inclusive and participatory governance. Through monthly coordination calls, bilateral exchanges, and targeted follow-ups with CIFAL Directors and their teams, UNITAR ensured that operational tools and processes reflected on-the-ground realities. These exchanges strengthened transparency, accountability, and shared ownership across the Network, while enhancing the usability and effectiveness of the systems introduced.

As a result, 2025 represented a year of consolidation and strategic fine-tuning, reinforcing the Network's ability to empower institutions, local authorities, practitioners, and communities through impactful capacity-building initiatives grounded in evidence-based approaches.

Looking ahead, 2026 marks a transition from consolidation to acceleration. The CIFAL Global Network is positioned to further scale its impact through the implementation of strengthened planning frameworks, enhanced data-driven monitoring systems, and deeper alignment with emerging global agendas such as the Pact for the Future, UN 2.0, and UN 80. Greater emphasis will be placed on cross-Centre collaboration, innovation in learning methodologies, and the expansion of strategic partnerships with academic institutions, governments, and international organizations. In parallel, the Network will continue to explore opportunities for geographic expansion while maintaining rigorous quality and governance standards.

Thematic Areas

To better reflect the dynamic work carried out by CIFAL Centres and to ensure strong alignment with global development priorities, UNITAR has updated the Thematic Areas of the CIFAL Global Network. This update aims not only to showcase the breadth of activities across the Network but also to guide partners and participants in identifying opportunities for engagement, collaboration, and capacity-building.

The revision was informed by a comprehensive review of the Centres' training activities, current global challenges, and the strategic frameworks of the United Nations, including the 2030 Agenda for Sustainable Development and the emerging priorities set out in the Pact for the Future. Special attention was given to identifying trends and topics of growing importance such as digital transformation, youth empowerment, climate action, sustainable finance, and governance innovation.

In developing the updated framework, UNITAR considered relevant UN structures and global platforms such as the High-Level Political Forum, the General Assembly, and key UN agencies (e.g., UNDP, UNEP, UNESCO, UN Global Compact). The five pillars of the 2030 Agenda; Peace, People, Planet, Prosperity, and Partnerships; also served as guiding references to ensure consistency and global relevance.

As a result, the Network now operates under six core thematic areas, covering more than 100 training topics. These areas capture the diversity, innovation, and local impact of the CIFAL Centres' work worldwide, serving as a platform for strategic partnerships, knowledge exchange, and action-oriented learning.

Looking ahead, we will continue to update and refine the priorities and thematic outreach of the CIFAL Global Network to remain fully aligned with the emerging ambitions of UN80 and UNITAR's Strategic Framework 2026–2029, strengthening our collective capacity to drive meaningful impact worldwide.

The CIFAL Global Network Around the World

Training Profile and Performance Highlights in 2025

Building on this strengthened governance foundation, the CIFAL Global Network delivered 406 activities, reaching a broad and diverse audience of 162,246 beneficiaries worldwide.

 **406**
ACTIVITIES

 **162,246**
BENEFICIARIES

The thematic distribution of activities revealed clear priorities across the Network. **Sustainability Learning** remained the strongest focus, representing nearly **45%** of all trainings delivered throughout the year. This was followed by **Human and Social Development**, which accounted for just over **20%**, reflecting the continued emphasis on strengthening social systems and inclusive public services. **Environment and Climate Action** contributed approximately **10%**, while **Health and Well-Being** represented around **8%** of the total portfolio. Other thematic areas maintained a steady presence, with **Road Safety** at **7%**, **Economic Development** at **6%**, and **Youth Leadership** at **3%**, together illustrating the breadth and diversity of the Network's capacity-building mandate.

These proportions illustrate the Network's ability to respond to diverse development needs while maintaining strong focus areas consistent with global and local priorities.

The 2025 beneficiary demographic exhibited balanced participation, with **women representing 46%** of all participants, **men 53%**, and a small share identifying as other, reinforcing UNITAR's commitment to inclusive and gender-responsive capacity development.

The range of event types—including in-person workshops, online training, hybrid seminars, technical forums, and multi-stakeholder learning sessions—enabled Centres to tailor delivery to local realities while expanding global reach. This combination of thematic breadth, inclusive participation, and adaptive formats underscores the CGN's ongoing role as a unique, decentralized platform capable of mobilizing knowledge across borders and sectors.

Key Priorities for 2026

Building on the achievements of 2025, the CIFAL Global Network will focus in 2026 on a set of strategic priorities aimed at scaling impact, strengthening collaboration, and enhancing its role as a global platform for localized learning:

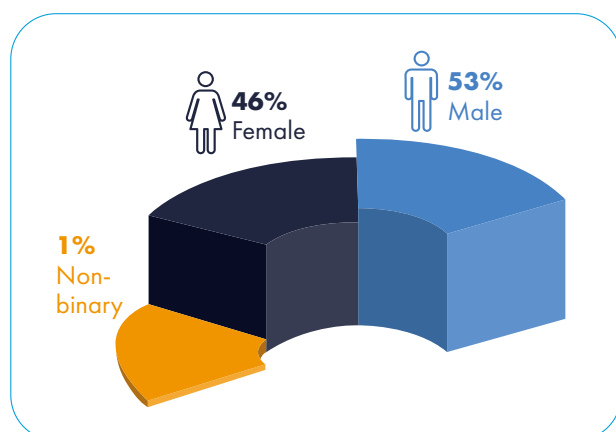

- **Scaling impact and visibility** through the implementation of an expanded and strategically aligned global training portfolio, as reflected in the 2026 Training Catalogue.
- **Enhancing data-driven decision-making** through strengthened monitoring, evaluation, and reporting systems, including the improved use of performance indicators, impact measurement tools, and data analytics to inform strategic planning and resource allocation.
- **Advancing research and knowledge production**, encouraging CIFAL Centres to contribute to research initiatives, publications, case studies, and knowledge products that capture lessons learned, showcase impact, and position the Network as a thought leader in capacity-building for sustainable development.
- **Promoting innovation in learning methodologies** by expanding the use of digital tools, hybrid and flexible delivery formats, and learner-centered approaches aligned with emerging trends under UN 2.0.
- **Deepening strategic partnerships** with academic institutions, governments, international organizations, and the private sector, while also strengthening collaboration within the Network to unlock new opportunities for joint funding, programme development, and outreach.
- **Supporting strategic and sustainable growth of the Network**, including the careful expansion of CIFAL Centres based on demand and quality standards, as well as the reinforcement of governance, compliance, and operational excellence across all Centres.
- **Strengthening alignment with global agendas**, ensuring that CIFAL activities contribute meaningfully to key international frameworks such as the Pact for the Future, UN 2.0, and the UN80 initiative, while maintaining strong responsiveness to local development needs.
- **Strengthening joint programming between UNITAR and CIFAL Centres**, including the co-design and co-delivery of flagship training activities, global seminars, and thematic initiatives that enhance coherence across the Network and reinforce UNITAR's added value at the local level.
- **Fostering collaboration among CIFAL Centres** by promoting joint activities, peer-to-peer exchange, and regional or cross-regional initiatives, enabling Centres to leverage complementary expertise and increase collective impact.

Together, these priorities reflect a shift toward greater integration, innovation, and collaboration across the CIFAL Global Network, positioning it to deliver more impactful, knowledge-driven, and partnership-oriented capacity-building initiatives in 2026 and beyond.
