

Stakeholder workshop

Strengthening integrated chemicals and waste management: How can a future framework beyond 2020 ensure effective engagement of all key stakeholders?

Bucharest, Romania (26 August 2022)

Conference Center Romexpo Street: Bd. Mărăști no. 65-67, 011465, Bucharest

Workshop Objectives

The workshop provides stakeholders an opportunity to learn about, discuss and share feedback on the three dimensions of integrated chemicals and waste management presented in [SAICM INF Document IP 18](#) prepared by the IOMC. The three dimensions include: 1. Developing basic national chemical management systems and capacities in all countries; 2. Integrating chemicals management in key industry sectors and product value chains; and 3. Integrating chemicals management with sustainable development issues and initiatives. The document introduces each dimension of integrated chemicals and waste management and provides suggestions relevant for “Beyond 2020” targets and strategic objectives.
