roadsafety@unitar.org
Overview

The Autosobriety Training Programme consists of educational tools that aim to contribute to reduce and prevent alcohol-related traffic fatalities and injuries.

By 2030, halve the number of global deaths and injuries from road traffic accidents

SDG 3.6

By 2030, halve the number of global deaths and injuries related to drivers using alcohol, and/or achieve a reduction in those related to other psychoactive substances.

The Programme

By 2030, halve the number of road traffic injuries and fatalities related to drivers using alcohol, and/or achieve a reduction in those related to other psychoactive substances.

An interactive online course available at UNITAR’s Virtual Learning Environment: https://www.unitar.org/event/full-catalog/autosobriety-training-programme-prevent-drink-driving

Practical exercise that includes the use of Virtual Reality (VR) glasses to experience the effects of alcohol on driving performance

A microlearning course available at www.edapp.com/educate-all

In the Course Library, look out for “UNITAR – Road Safety” Category
