

UNITAR Future Global Youth Leaders Programme

Group Presentation 1

- **Group Title:**

LHL (Love house in Liangshan)

- **Group Members:**

1. Leader:

Roy Hongrui Huang

2. Members:

Bonnie Boran Le

Hathaway Yiqi Wang

- **Background and Solution:**

Our group is dedicated to advancing girls' education in Liangshan, Sichuan Province, China. Over the past two years, we've implemented several initiatives, including a concept education course led by an international volunteer team, the creation of a "secret box" email address for local girls to communicate anonymously, and an upcoming project to connect local teachers with study opportunities in other provinces.

Given the large number of students from primary through high school, reaching each one effectively has been a major challenge. To address this, we've developed an online platform where students can anonymously post their concerns and struggles. Our team of professionals then provides solutions to these issues.

This platform allows students to benefit from responses to similar problems,

enhancing the efficiency of addressing common issues. However, we face challenges related to financial aid for textbooks, study essentials, hiring teachers, and further developing the platform. To overcome these challenges, we plan to seek support from charitable foundations and organizations.

- **Impact:**

Our primary goal is to ensure that girls in Daliangshan live fulfilling lives both mentally and physically. The initiatives we've implemented—such as the online platform, education courses, and teacher exchange programs—promise significant social impact. They will enhance the education and mindset of these girls, inspiring positive change across high schools, middle schools, and beyond.

The Jiangsu Youth Development Foundation has committed to training 50 teachers annually for the region and is eager to collaborate with UNITAR for further educational support. Our ten-year plan aims to transform the mindset of an entire generation, helping girls in Daliangshan gain confidence and optimism about their futures.
