

INVITATION

to the 2nd EL@RA CONFERENCE '23

“Technologies and Techniques to Support Sustainable Education in the Academic Sphere”

PEDAGOGY 5.0 –

CREATIVITY, ENTREPRENEURSHIP, FLEXIBILITY AND THINKING OUTSIDE THE BOX

14 - 15 DECEMBER 2023

Organised by the Technical University of Sofia, Technical University of Cluj-Napoca, Technological University Dublin (members of the European University of Technology) & United Nations Institute for Training and Research (UNITAR)

The Fourth Industrial Revolution was and is still focused on the digitalisation of processes and the use of AI to increase productivity. Industry 5.0, on the other hand, focuses on the human factor and the human as the centre of the production process. Following this train of thought, we have come up with the idea to initiate a dialogue about the future of teaching and learning in the field of higher education (which will figuratively be called PEDAGOGY 5.0) at this year's edition of the forum “Technologies and Techniques to Support Sustainable Education in the Academic Sphere”.

WE LOOK FORWARD TO WELCOMING YOU!
