## **Challenges**

## **Solutions**

**PROBLEM:** lack of integrated, national long-term planning (a crisis is an exceptional event that has to be solved with exceptional but temporary measures, that do not necessarily align with long term planning)

Policy coherence (in relation to crisis and development goals)

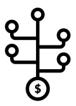

Goal: sustainable, resilient, socially inclusive development

**Negative externalities** 

**Economic diversification** strategies, tax and banking, foreign investments

International financial

institutions

**REFORMS** 

**Crisis** 

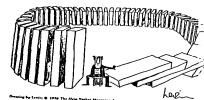

**Capabilities focused** in structural main economic sectors needs

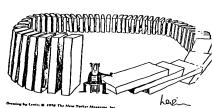

the crisis

Short term, reactive approach to finding solutions

**Financial planning** 

and national response

Strong leadership and decision making /

External recognition /

Pride to have solved

Improve long-term perspective, set up institutions for continued systemic planning and improved policy formulation and implementation
