Chart 1: Summary of the main findings of the evaluation

THE EFFECTIVENESS OF LEARNING-RELATED PROGRAMMING

54,840 Total Beneficiary outreach in 2016

35,093 Learning-related beneficiary outreach in 2016

But...Have participants applied skills and knowledge after UNITAR's learning-related events?

82% of respondents confirmed application of knowledge and skills to their workplaces

Application rate is not affected by gender: 81% male respondents and 79% female respondents applied the knowledge/ skills

Blending face-to-face with e-learning: 92% of respondents applied skills/knowledge acquired from the training. Face-to-face and e-learning participants applied 90% and 79%, respectively

Enabling factors

52% of respondents state that the opportunity is the main enabler

50% of respondents consider the importance of the knowledge to his/her job sucess

Preventing factors

33% of respondents highlight the lack of opportunity to apply as the main barrier

19% of respondents affirm that the lack of time is the 2nd biggest barrier

Source: UNITAR

Executive Summary

The Planning, Performance and Results Section (PPRS) of the United Nations Institute for Training and Research (UNITAR) undertakes a periodic independent assessment of learning-related programming to determine the extent to which on-the-job or other behavioural changes have occurred from learning. The assessment complements self-evaluations undertaken by programmes to assess participant reaction and achievement of learning outcomes.

Given the scale of learning-related programming in UNITAR's overall programme of work, accounting for 60 per cent of beneficiaries and 67 per cent of events in 2016, it is important to examine under what circumstances learners have applied or transferred knowledge and skills acquired from UNITAR training. Evaluating the effectiveness of learning depends not only on beneficiary reaction or the degree to which learning outcomes are achieved, but also the extent to which knowledge and skills acquired from training are applied to practice, and ultimately, produce positive changes in beneficiaries' performance in their workplaces.

Methodology: A survey was deployed to obtain data and information on the application or non-application of knowledge and skills from 2016 learning events. In total, 1,041 randomly sampled participants responded to 21 open and closed ended questions. Forty interviews were also held to better understand the factors contributing to or preventing application of knowledge and skills. Analysis examined various contributing factors, such as gender, organizational affiliation, thematic area, event duration, completion rate, and learning assessment. Frequency of application, time spent on tasks, confidence and other factors were also examined.

Key findings: Results indicate the presence of widespread application, with 82 per cent of respondents from the sample population confirming application of knowledge or skills, which is slightly up from the rate of 79 per cent reported in 2015. The rate is also higher among respondents who completed events (83 per cent) in comparison to those who did not complete the event (70 per cent). The analysis of survey and interview results indicates that factors such as organizational affiliation, thematic area, event duration, and completion rate have a direct relationship with application of knowledge and skills. The results of the evaluation show no direct relation with gender, however.

Much of the knowledge and skills application reported was either frequent (51 per cent) or occasional (28 per cent), while only 19 per cent of respondents confirmed having always applied knowledge/skills. Regarding confidence to apply or transfer knowledge/skills, 31 per cent and 57 per cent of respondents expressed full and much confidence in application, respectively. Most respondents confirmed having both a personal and professional interest in the training. Some 77 per cent of respondents stressed that application/use of knowledge/skills are either entirely or very important to their job success.

In some cases, environmental aspects influence application/transfer of knowledge/skills to the workplace. Respondents shared that opportunity to apply and importance to job success are the most important factors that enabled them to put knowledge/skills to practice, representing nearly 47 per cent. The lack of opportunity to apply and lack of time are the top barriers, accounting for approximately 52 per cent. Additionally, the lack of funds was frequently cited among other factors relevant to prevent the application of skills.

Changes in professional activity and performance of learners were also observed, including the use of methods, technologies and tools; improved teamwork; and new job-related tasks and responsibilities. Survey respondents and interviewees cited examples of multiplying

knowledge/skills acquired through the delivery of training and the dissemination of publications or other written works.

Moreover, examples provided by the respondents on how they have transferred/applied the knowledge/skills at their workplaces can be interpreted in different categories. Content analysis was used to better organize different examples of knowledge and skills application over time. Respondents confirmed a change in mindsets after a UNITAR training; disseminated new knowledge/skills with family members, colleagues, peers, students and professors; transferred knowledge/skills via external advocacy with community members; developed new projects based on the knowledge/skills acquired; and assumed new roles or were promoted.

Although 18 per cent of respondents did not confirm application or transfer of knowledge/skills in their workplaces, it does not necessarily mean that knowledge and skills are irrelevant. Most respondents conveyed reasons for not applying knowledge or skills e.g. the topic of the event was not the same as her/his job or participation in the training was used primarily to seek a new job. All respondents not applying knowledge/skills confirmed their intention to apply in the future when an opportunity would arise.

Recommendations:

Recommendations from the evaluation include the following:
1) Programmes should increase the number and proportion of learning events that include objective assessment of learning.
2) Programmes should create incentives to help ensure that participants successfully complete learning events and obtain certification of completion if relevant.
3) Programmes should take concrete steps to integrate follow-up actions into knowledge- and skills-based training, such as learning retention plans, communities of practice, or post-training coaching or mentoring.
4) Programmes should provide post-training letters to participants to encourage supervisor support for the application of knowledge and skills.

Recommendations issued from 2016 report:

The evaluation recalls the five recommendations issued in the report of 2015 learning-related programming:
1) Programmes should expand opportunities for blended learning, particularly by combing e-Learning with face-to-face interaction.
2) Programmes should encourage learners to inform their supervisors of attendance at the beginning of the learning event, and to provide their supervisors with updates as learning progresses and results are achieved.
3) Programmes should refine pre-event announcement information to include objectives on the application/use of knowledge and skills to participant workplaces.
4) When feasible, programmes should engage in learning-related events that are part of longer duration initiatives.
5) Programmes should ensure the integration of ready-to-use tools in learning programmes to facilitate the application of knowledge and skills by beneficiaries in the work place.

1. Introduction

1. The United Nations Institute for Training and Research (UNITAR) is a dedicated training arm of the United Nations. Aiming to strengthen the effectiveness of the United Nations, UNITAR develops the capacities of individuals, organizations and institutions to enhance global decision-making and to support country-level action for shaping a better future. The key thematic areas in which UNITAR works include strengthening multilateralism; promoting economic development and social inclusion; advancing environmental sustainability, green development and climate change; promoting sustainable peace and post conflict reconstruction; increasing capacities for resilience and humanitarian assistance; and supporting the strategic implementation of the 2030 Agenda for Sustainable Development.

2. In 2016, UNITAR provided training, learning and knowledge-sharing services to 54,840 individuals through the delivery of 456 events (chart 2). Sixty-nine per cent of these events (or 316) and 64 per cent of these individuals (or 35,105) took part in training having specific learning outcomes. The events include briefings, courses, fellowship programmes, workshops and other events organized through a face-to-face (accounting for 48 per cent of beneficiaries) and online (52 per cent of beneficiaries). [1] The male to female gender ratio was 71 to 29.[2] Just over half of the learners took part in events with an objective assessment of knowledge [3]; 73 per cent of learners completed these events, although only 20 per cent of learners completing events with objective assessment of learning obtained certificates of completion (the remaining obtaining certificates of participation).

Chart 2: UNITAR's primary outputs

TRAINED BENEFICIARIES

UNITAR PROVIDED TRAINING, LEARNING AND KNOWLEDGE-SHARING SERVICES TO **54,840 BENFICIARIES IN 2016 (INCREASE OF 38 PER CENT OVER 2015)**

LEARNING-RELATED BENEFICIARIES INCREASED BY 50 PER CENT, FROM 23,455 IN 2015 TO **35,093 IN 2016**

OVERALL **MALE TO FEMALE GENDER RATIO WAS 71 TO 29** (OR 56 TO 44 WITHOUT PEACEKEEPING)

50 PER CENT OF BENEFICIARIES ARE FROM SPECIAL SITUATION COUNTRIES, I.E. LDC, LLDC AND SIDS

20% OF UNITAR'S 35,093 LEARNING EVENT PARTICIPANTS RECEIVED A CERTIFICATE OF COMPLETION.

---

[1] Three events were recorded as blended delivery with 52 participants (accounting for less than 1 per cent).

[2] Without counting peacekeeping training beneficiaries, the male to female gender ratio was 56 to 44.

[3] 157 events included an objective assessment of learning. An equal proportion of participants took part in learning-related events without objective assessments of knowledge, with over 10,000 certificates of participation issued.

3. Participant reaction to UNITAR services was positive, with 88 per cent of respondents agreeing or strongly agreeing that the training was job-relevant, 72 per cent agreeing or strongly agreeing that information was new, 91 per cent confirming intent to apply/use information, and 91 per cent agreeing or strongly agreeing that training was useful overall.[4]

4. In addition to measuring the achievement of learning objectives through various instruments, including participant self-assessment and objective testing, UNITAR regularly tracks the application and use of knowledge and skills through periodic post-training surveys. The subsequent sections of this report review the principal questions of this evaluation; describe the methods and data collection used, as well as the limitations; and present the findings, conclusions and recommendations. The scope of the evaluation focuses on 2016 learning-related programming, with findings compared to 2015 where relevant.

2. Key Evaluation Questions

5. The key questions framing this evaluation are the following:

- To what extent were knowledge and skills acquired through training events applied or used in the participants' respective workplaces?
- What were the noticeable and measurable changes resulting from application/use?
- How frequently are knowledge and skills applied or used?
- What are the principal enablers and barriers to the application/use of knowledge and skills?
- Is the application of knowledge and skills different based on gender considerations?

3. Methods and Data Collection

6. The methods and data collection tools used for the evaluation are threefold and include a review of documents, including learning event announcement information, event and participant statistics and narrative reports; the deployment of an online survey to a pool of randomly sampled participants from 2016 learning events; and semi-structured interviews with sampled survey respondents.

3.1 Survey

7. A survey was designed to assess the extent to which knowledge and skills acquired from learning events were applied/used by participants. The survey included questions on whether and how knowledge and skills were applied/used, the frequency and confidence in application/use, and the factors that may have enabled or deterred application/use. The survey also included questions to sort respondents by gender, organizational affiliation, thematic area and geographic region. The survey is attached as annex 1.

8. The survey was sent to the email addresses of a random sample of 5,449 participants (1,733 from learning events without an objective assessment of learning and 3,716 with an objective assessment of learning) from 187 of the 316 learning events (or 59 per cent)

---

[4] Based on responses from 22 per cent of participants from 2016 learning-related programming.

delivered in 2016.[5] The list of events included in the evaluation is attached as annex 2. The survey was deployed in English, French and Spanish languages in June 2017. Two follow-up reminders were sent. Failure messages were received from approximately 500 participant email addresses. A total of 1,041 replies were received during the period in which the survey was open, representing a 19 per cent response rate.[6] Charts 3-6 below summarize the profile of the respondents by programme area, gender, training delivery format and affiliation.
Source: UNITAR

---

[5] The sample was taken from a pool of 10,628 cleaned data participants from 216 learning events (85 events without objective assessment of learning and 131 events with objective assessment) as recorded in the UNITAR events management system (EMS). Ninety events included either no or invalid email addresses and were thus excluded from the evaluation. An additional 9,000 participants from the UN CC:Learn Introductory e-course on climate change were excluded from the evaluation, since a separate survey on beneficiary application of knowledge and skills was administered by the Green Development and Climate Change Programme and the large number of beneficiaries from this series of courses would have skewed the results. The response rate for participants enrolled in training with and without objective assessment of knowledge was 19 per cent and 20 per cent, respectively. The sample contains a 2.4 per cent error level with a 90% confidence rating.

[6] In comparison, in 2015, 814 respondents replied to the survey from a sample of 3,000 cleaned data participants.

3.2 Interviews

9. As a follow-up to the survey, semi structured interviews were organized with 40 respondents who expressed a willingness to be contacted. The following criteria guided the selection of the interviewees: one half confirming application of knowledge and skills, one half non-application; one half participants with objective assessment of knowledge, one half participants without objective assessment; gender parity (50 per cent female, 50 per cent male); and representation of perspectives from diverse geographic regions and professional backgrounds.

10. In total, **95 participants were contacted and 40 were interviewed** (21 male and 19 female) from 28 nationalities from Africa, Asia, Europe and North America.[7] Invitations to the interview were also sent to respondents from Latin America and the Caribbean, although none from this pool was available to be interviewed or replied to the request (Chart 7). Twenty-seven interviews were held in English and 13 in French.

Chart 7: Geographic location of interviewees (2016)

---

[7] The first contact was made with 60 respondents (30 confirming application and 30 non-application) in July 2017. In the first round, 28 interviews were conducted with 15 interviewees confirming application and 13 interviewees not reporting application of skills/knowledge. The gender ratio was maintained with 14 male respondents and 14 female respondents. Due to insufficient positive responses, a new list of 22 participants, based on positive examples of application was established. Due to insufficient positive responses, 13 additional respondents having cited examples of application or non-application were contacted for probing/additional clarification.

4. Limitations

11. As with all evaluations, it is important to note several limitations (chart 8). First, while the survey allows for quantitative and qualitative data collection, the findings are largely based on respondent perception and a partial representative pool of learners. While 35,754 participants were recorded in 316 learning events, contact information was only available for 20,315 (or 58 per cent of all learners) from 202 events (or 64 per cent of all learning events). **The results of the evaluation should therefore only be interpreted as representative of the sample population and not generalized across all UNITAR learning-related programme areas.**[8]

Chart 8: Limitations

The findings are based on **respondent perception**. It means that results might be biased, according to their experiences

Contact information was only available for 15,774 beneficiaries (**67 per cent of all learning beneficiares**)

Results from the surveys and interviews **cannot be generalized** across all UNITAR learning-related events

12. Second, except for some variables such as delivery method (face-to-face, e-Learning, blended) and event length and theme, the evaluation treated learning-related events similarly, although learning events invariably differ in terms of targeted audiences, learning objectives, cognitive levels of learning, and presence of moderators/facilitators (i.e. instructor-led v. self-paced), and follow-up communities of practice.

13. Third, the sample of the interviewees is small in comparison with the number of respondents from the deployment of the survey. At the outset, the interview process was established to balance different groups (gender ratio, application rate, objective assessment and geographical distribution). However, because of the lack of feedback and availability of some participants, the interviews did not collect information from participants from Latin America and the Caribbean.

14. Fourth, most learning-related programming was either administered on a stand-alone basis (e.g. executive-type training, independent of broader capacity development project outcomes) or was not of a sufficiently large scale to include objectively verifiable on-the-job performance changes. As research suggests, learners on average forget 90 per cent of what they learn after one week of the training event and wrongly assume that the fluency of a topic for genuine comprehension. Results therefore need to be interpreted with caution, since application of knowledge and skills may not necessarily be fully attributable to UNITAR training.

---
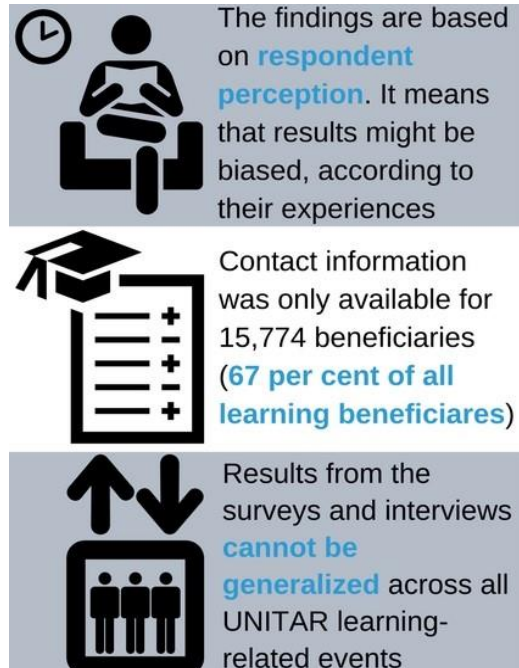

[8] While not all events were included in the evaluation, all five high-level programmatic areas of the 2014-2017 strategic framework were represented and all UNITAR programmes, except for the Peacemaking and Preventive Diplomacy Programme (due to the non-availability of beneficiary contact information).

5. Findings

## 5.1 To what extent were knowledge and skills applied/used?

15. As shown in Graph 1, **82 per cent of respondents confirmed transfer or application** of knowledge and skills, a result which is marginally higher than the 79 per cent rate reported in 2015. The 2016 rate is 9 percentage points below the intent to use rating (at 91 per cent) recorded by respondents of post training feed-back questionnaires.[9]

Graph 1: Application rate of the knowledge/skills at workplace
16. Charts 9-12 disaggregate the results of application/use by gender, event duration, affiliation, completion, event type, programme area and job importance. The application rate of knowledge/skills among female respondents increased by 5 per cent to 79 per cent in 2016, while male respondents maintained the rate of 81 per cent (chart 9). **In comparison to 2015, the gender gap decreased from 7 per cent to 2 per cent, suggesting that gender considerations are not likely to influence the application of knowledge and skills.**

Chart 9: Application rate by gender (2015-2016)

17. Corroborating findings from 2015, results confirm that application is strongly linked to the duration of training delivery, as shown in Chart 10. Shorter events, such as those lasting one day or less, contain the lowest application rate, at 67 per cent; in contrast, longer events present more than 80 per cent of application rate. For example, events lasting between 10 and 20 days have an application rate of 89 per cent, i.e. 22 per cent greater than those organized over one day or less. In events with more than 20 days of duration,

Chart 10: Application rate by event duration

---
[9] Based on feedback from 1,041 participants of a sample of 5,449 participants from 187 learning-related events (or 59 per cent of the total number of learning events delivered in 2016) in which 35,123 participants took part. The average response rate was 19 per cent.

386 respondents out of 455 (or 85 per cent) confirmed application of knowledge and skills following a training event.

18. In 2016, local government officials, non-UN international organization officials and NGO staff reported the highest rate of application, accounting for 91, 91 and 89 per cent of the respondents, respectively (table 1). The survey findings also show two changes in relation to 2015: national level government officials no longer represent the sector with the highest application rate; and the application rate increased from 70 per cent to 91 per cent considerably for representatives of international organizations (non-UN) officials, from 71 per cent to 83 per cent for state/provincial government officers, and from 60 to 72 per cent for UN local staff.

Table 1: Application rate by professional affiliation (2016)

| Affiliation	Yes	No
Government – local	91%	9%
International organization (non UN)	91%	9%
Non-governmental organization	89%	11%
Government – national	83%	17%
Government - state/provincial	83%	17%
United Nations - international staff	81%	19%
Regional organization	80%	20%
Academia/university	73%	27%
United Nations - local staff	72%	28%
Private sector	69%	31%

19. The results also found the application rate to be higher (83 per cent) for those respondents who **completed an event** in comparison to those who did not complete (70 per cent), as illustrated in chart 11. The overall completion rate of applicants and non-applicants represents 82 per cent of the respondents.

Chart 11: Application rate by rate of completion (2016)

|	Yes	No
Overall	82%	18%
Event completed	83%	17%
Event not completed	70%	30%

■Yes ■No
20. In relation to learning delivery, while the overall number of e-learning respondents (72 per cent) was higher than the number of face-to-face respondents (19 per cent), as shown in chart 11, only 79 per cent of respondents from e-Learning courses confirmed application/use, in comparison to 92 per cent and 90 per cent of respondents from blended and face-to-face learning events, respectively. While the small number of blended learning participants does not allow for much interpretation, **blended learning[10] and face-to-face participants do show a higher rate of application/use** among the respondents.

Chart 11: Application rate by type of event (2016)
21. As shown in chart 12, respondents from learning events related to satellite imagery/ geographical information systems, environmental governance/green economy and local development/decentralized cooperation confirmed application at 93, 86 and 85 per cent, respectively. Nearly 78 per cent of respondents who confirmed application consider fully or very important to apply knowledge/skills to their job success. This rate is 15 per cent higher than in 2015.

Chart 12: Application rate by programme area (2016)

---
[10] Based on participants' feedback from approximately 10 different blended learning events according to the information received from participants. Only 3 blended learning events were registered as per organizational definition.

5.2 Reported behavioral changes in the workplace

22. Survey respondents reported various changes in work-related performance from acquiring knowledge and skills, including:[11]

- Disseminating knowledge/skills in different social and professional circles e.g. between family members, community members, colleagues, supervisors, scholars, government officials and civil society organizations;
- Developing new projects and funding proposals
- Assuming leadership roles;
- Shifting mindsets following the acquisition of relevant knowledge/skills; and
- Using different skills, knowledge and terminology specific to the training, such as enhanced teamwork, project management, communication and public speaking, time management, reporting writing, leadership, presentations, needs assessments.

23. The following examples showcase the changes in activity and performance by different respondents across various categories:[12]

Direct application: Participants confirming the application of knowledge/ skills directly in their workplaces.

"I now can apply DSGE (Dynamic stochastic general equilibrium) models in analyzing macroeconomic fluctuations. (I) have also tried to investigate the business cycle of my country with the help of this technique with other colleagues […]"

"I have used the skills to manage drought and flood early warning systems at my workplace which is an early warning institution"

"As I have been working in both conflict and post-conflict settings in Burundi, I never knew what conflict analysis is. Now, any intervention by my organization in the country is preceded an analysis of the conflict at local level including actors, causes, stages of the conflict, etc. to better deal with the concerned conflict".

"In this year, we are planning to compile and produce the environment statistics of Nepal. This e-learning course helped me to develop the SCP (Sustainable Consumption and Production) related indicators which we will include in our publication".

"(I) used the knowledge gained in my day-to-day work when asked to brief memos and/or reports that are related to industrialization and trade, especially trade facilitation issues".

"Developing microfinance policy using the concepts I learned in capital market and institution course".

"I applied the knowledge I gained during the climate change course to my occupation, which is Architecture, in designing structures, climate factors in conjunction/relationship with the immediate environment has to be considered to generate effective and efficient design".

---

[11] Due to the high number of responses, a selection was made by the authors.

[12] It should be noted that these changes cannot be uniquely attributed to attendance in a UNITAR learning event.

Dissemination: Participants have shared knowledge/skills acquired with family members, colleagues, supervisors, students or professors.

> *"I prepared a report outlining what was discussed and taught at the training. The report was submitted to the Executive Director of the Environmental Protection Agency (EPA) in my country to assist with the negotiations at the COP 22 which was held in Marrakech […]"*
>
> *"As an Adjunct Professor of three universities I have integrated the resiliency factors cities in courses I teach such as urban planning and community architecture"*
>
> *"As part of our landscape conservation work in Kilombero region of Southern Tanzania, I have incorporated the rights-based approaches into our project design and implementation. I have also used materials from the course to inform colleagues on rights-based approaches to conservation and make the case for taking an informed and proactive approach to these approaches in our work".*
>
> *"I transferred the whole experience to my cadets and urged them to sign up for any the diverse collection of courses and they did so".*
>
> *"As a teacher, it is always important to update myself in order to pass new knowledge to my students, such as the 17 SDGs, were we worked on all of them explaining how it would benefit the future of the world"*

Change in mindset: UNITAR training produced a change in the mindset of the participants.

> *"Having a broader perspective of what gender may mean has assisted me to look at work differently as a manager to be able to allocate work to candidates whom I would not have given the work to before due to them being females and thinking the work was more for males. This has absolutely opened my mind".*
>
> *"From my background, gender issues are very sensitive issues by my understanding of the topic: 'Gender Matters' has helped me to relate others with Gender gap conscientiousness and respect"*
>
> *"As the Programme Officer for UN system-wide Coherence and the DaO (the Delivering as One Initiative), the information served to better apprehend the linkages between the three pillars of the UN, the content of the SDGs for the MAPS (Mainstreaming, Acceleration and Policy Support) and the operationalization of the Agenda at the HQ and field levels".*
>
> *"I have gained more knowledge concerning the fundamentals of Anti-Money Laundering. This knowledge helped to participate more in online discussions with other CFATF (The Caribbean Financial Action Task Force) countries and also in participating in a de-risking seminar held in Jamaica. If you do not have the basic skills, it would not be possible in participating".*

Project Development: Participants confirming using knowledge/skills to produce new content or to develop a project in a related area. This category is different from direct application, in the sense that there is an element of creativity and adaptation to the local, regional or national context.

> *"I have used the knowledge gained from the gender course to assist in the design of a training module on gender for my organization. We are now currently working on a tool for gender mainstreaming and the same information and knowledge will inform how we structure and tailor our tool".*
>
> *"I have established a network and movement in Asia pacific called 2030 youth force. 2030 Youth Force inspires youth to engage in promotion of the SDGs and initiate actions to drive positive changes towards an inclusive and peaceful society in Asia-Pacific. Using SDG 16 as an entry point, the network will focus on peacebuilding along with strengthening youth capacities for participation in decision-making".*
>
> *"I designed a program for the protection of Cameroonian Migrants from Bui, in the North West Region for the Peace and Justice Commission of the Catholic Church based on my knowledge of International Migration Law gained from UNITAR".*
>
> *"I developed WebGis application for disaster situations. Practically applied for flood in May 2017".*
>
> *"Development of the strategic plan and action plans for the organization adopting knowledge on SDGs gained from the UNITAR".*

Raising Awareness/External advocacy: Participants confirmed using knowledge/skills acquired to call attention on specific topics in a community in order to raise awareness.

> *"1) Help(ing) schools with tsunami knowledge and setup evacuation sites; 2) Doing DRR (Disaster Risk Reduction) awareness to my local community; 3) Help(ing) students who did their research in tsunamis and other disasters which occurred in our Islands (…)"*
>
> *"Advocating on the issue of involving women in decision-making at local level and at the national level as well".*
>
> *"After completing the course 'Gender Matters' I acquired rich knowledge on issues arising from gender inequality in corporations, work places, communities, small and big group events, households, etc. and how to deal with these issues".*
>
> *"Les connaissances acquises m'ont permis d'entreprendre une sensibilisation autour de moi notamment dans le domaine de la gestion des ordures domestiques qui polluent considérablement".*

Job promotion/new job: Participants who received a promotion in their workplaces or found a new job following a UNITAR training event.

> "*After orientation training, I was deployed as Police Mentor in (the) MINUSTAH (United Nations Stabilization Mission in Haiti)*"
>
> "*Nommé rapporteur national du groupe de travail sur les services et changes de renforcement de capacité en matière du commerce des services et d'expliquer l'importance de l'exportation des services aux autorités gouvernementales*".

Mixed reasons: Participants applied, disseminated, mobilized, invented and/or promoted initiatives based on the knowledge/skills acquired via UNITAR training.

> "*My analytical skills have greatly improved; I can better analyze political and electoral contexts of various democracies in Africa. Particularly, the impact of the skills and knowledge acquired was evident in my election assessment reporting during the 2016 Long Term Election Observation in Ghana and the 2017 African Union Pre-election Assessment Mission in Kenya which I was both engaged as an electoral expert. I easily took on coordinating roles as the Northern regional coordinator in Ghana and presently as an electoral expert and member of the African Union – Election Observation Mission core team in Kenya*".
>
> "*My motivation to attend this workshop was to learn strategies and techniques for waste management and then try to recommend local government officials (in Pakistan) to implement/enforce these strategies and techniques in the city to control waste management issue during or after the floods. After that workshop, I efficaciously evaluated strengths and weaknesses related to waste management and city planning. I investigated the impact of methods involved in waste management and city planning and I suggested improvements to the local government in the regard of waste management and city planning*".
>
> "*Previously, I had already had experience in WH (World Heritage) missions, but following UNITAR course I was able to be more structured with the assessment, but also to consider deeply the existent differences within the cultural contexts, the authenticity and integrity principles interpretation, and the state of conservation approach. Furthermore, the exchange of knowledge between participants also contributed greatly to learn about conservation approaches in different cultural contexts and countries. Finally, it had an important impact on my classes for PhD and Master students, but also on my key-note openings and lectures in different continents*".

24. In addition to the above information collected through the survey, the evaluation also examined application of the correspondents who were interviewed, with the following sample of use/application having been reported:

- Improved participation at meetings and exchanges with colleagues, supervisors and communities;
- Increased confidence at work;
- Participation in competitive exams, preparation for job application, studies or for starting a new business;
- Collaboration with the private sector; and
- Support for the development of new legislation being drafted and presented to national institutions.

5.3 How frequently are participants applying what they learned or are likely to apply what they learned in the future?

25. As shown in chart 13, below, 17 per cent of the respondents have always applied the knowledge/skills, 46 per cent frequently, and 25 per cent occasionally. Only 1 per cent of respondents reported almost never applying knowledge/skills[13].

Chart 13: Application rate by frequency (2016)

Legend:
- Always
- Frequently (i.e. on many occasions)
- Occasionally
- Infrequently (i.e. almost never)
- N/A
5.4. What were the major enablers and barriers to application/ use?

26. **The two top enablers** of application/use of knowledge and skills were **opportunity to apply and importance to job success; the two top barriers are lack of opportunity and lack of time.** During the interviews, participants described in more detail their responses provided in the surveys, in accordance to their careers. As a result, lack of opportunity was mostly explained through the fact that the current job of the interviewee was not directly related to the content of the learning event – sometimes due to regular job rotation or other changes in profession.

---

[13] Data from 2016 cannot be compared to the past years due to the inclusion of the options "always" and "never" in the 2016 questionnaire only.

27. Four interview correspondents explained that they enrolled in training events that were not directly linked to their current job positions. In other cases, participants were students and took part in training to support their graduate studies (three interviewees). Moreover, there is one case related to a retired participant who participated in a training event for the sake of learning. Another participant (consultant) announced that he/she did not apply the knowledge/skills yet because it takes time to generate a product/training derived from UNITAR's learning event. Even though these participants expressed different reasons for non-application, they all expressed having confidence in applying knowledge/ skills of the opportunity would arise.

28. Interview correspondents who confirmed applying knowledge/skills also indicated preventing factors over time. For example, there are only few opportunities to apply when the content is not covered in the workplace, or just partially; the knowledge/skill acquired is not sufficient because training was too short; the lack of support from colleagues and supervisors.

Chart 14: Enablers and Barriers

ENABLERS

V E R S U S

BARRIERS

FACTORS THAT (DON'T) MAKE PARTICIPANTS APPLY KNOWLEDGE AND SKILLS FROM THE EVENTS

57 per cent state "Opportunity to apply" as main factor to apply knowledge/skills

The lack of opportunity to apply is highlighted by 33 per cent as the main barrier

50 per cent consider the importance of the knowledge/skills to his/her job success

19 per cent affirm that the lack of time is a big barrier to apply skills

40 per cent highlight the confidence to apply the knowledge/skills

18 per cent state that the lack of systems and processes to support their news skills is a barrier

25 per cent are able due to the action planning shared during the training

15 per cent state that their supervisors do not support them or their skills are not sufficient

Other factors are also relevant, as:
- systems and processes to support this application
- supported received from the supervisor and colleagues

The lack of funds and of support from colleagues and peers are also important to understand why participants have not applied their skills

6. Conclusions and Recommendations

Conclusions

29. The evaluation provides evidence of programme effectiveness through a widespread application/use of knowlegde and skills. The degree of application/use varies, however, across beneficiary affiliation, thematic area and delivery type. Application does not vary across gender, however. While application/use rates varied (marginally), data from 2015 and 2016 show relatively similar results for understanding the "why" question: **Opportunity to apply and importance to job success are clearly important drivers to application and use.**

30. While the evaluation did not aim to assess the impact of learning-related programming due to resource and sampling constraints, survey respondents and interview correspondents confirmed changes in professional responsibilities/tasks, the use of knolwedge/skills to produce new content or develop projects (e.g. develop policies), and changes in mindsets (e.g. vis-à-vis gender or environmental issues). Moreover, although not necessarily the intent of all learning events, some learners succeeded in applying/using knowledge and skills in their own training initiatives, while other learners confirmed having shared knowledge/skills with friends, colleagues, families and communities.

31. As positive as these conclusions are, they are limited to the sample of events included in the evaluation (64 per cent of learning events) and cannot be generalized across UNITAR learning-related programming. As noted in the evaluation's limitations, the findings are also based on respondent perception and the assumption that UNITAR training has resulted in strengthend knowledge and skills. Findings from the desk review of learning-outcome events show an emphasis placed on subjective, self-assessment of learning (as opposed to objective assessments), and a low course completion certification rate (for the 50 per cent of learning related events with objective knowledge assessments). This raises the liklihood that reported use/application of knowledge or skills may also be based on other contributing factors.

Recommendations

32. Based on the evaluation's findings and conclusions, the following recommendations are issued with a view to further enhancing the delivery and effectiveness of the learning-related programming.

> **Recommendation 1: Programmes should increase the number and proportion of learning events that include an objective assessment of learning.**
>
> Rationale: Establishing a clear linkage between the performance improvement of beneficiaries and UNITAR training requires solid evidence that knowledge, skills (and attitudes) have changed because of training. Fifty per cent of UNITAR's learning outcome-related training activities in 2016 (with a cumulative of some 16,000 participants) did not include any form of objective knowledge or performance-based assessments, however. While the results of participant self-assessments of knowledge and skills in many of these events may provide evidence of learning, literature suggests that self-assessments of knowledge are overrated. The linkage between performance

improvement or application and knowledge or skills development is thus largely assumption-based.

Recommendation 2: Programmes should create incentives to help ensure that participants successfully complete learning events and obtain certification of completion if relevant.

Rationale: While beneficiary outreach for learning-based programming is significant, with some 35,000 participants in 2016, the actual number of participants successfully completing learning events is much less. Moreover, the certification rate in 2016 was less than 50 per cent for learning-outcome related activities and only 20 per cent for learning-related events with an objective assessment of learning. These findings significantly diminish the contribution that UNITAR training can likely make in any follow-up actions that participants may take.

Recommendation 3: Programmes should take concrete steps to integrate follow-up actions into knowledge- and skills-based training, such as learning retention plans, communities of practice, or post-training coaching or mentoring.

Rationale: Although training is usually delivered in a discrete, time-bound manner, developing knowledge and skills and promoting attitudinal change quite often requires a sustained effort over time. Regular updates, reminders and sharing of news related to the content of the training are one possibility to increase the retention of knowledge and skills and continue the learning experience. Online communities of practice or coaching/mentoring programmes are also encouraged as they can further facilitate the application of knowledge and skills, as well as help participants identify 'opportunities to apply' knowledge and skills in the workplace.

Recommendation 4: Programmes should provide post-training letters to participants to encourage supervisor support for the application of knowledge and skills.

Rationale: In addition to the evaluation finding that opportunity to apply and importance to job success are the most cited factors for application (and the lack of opportunity to apply and lack of time as the most cited barriers), research indicates that supervisor support is an important enabling factor for the application. This recommendation is similar to the recommendation issued from 2015 learning events for programmes to encourage learners to inform supervisors of attendance at the beginning of a learning event and to provide learners to provide supervisors with updates as learning progresses and results achieved.

Recommendations from 2015 learning-related events:

Similar to the evaluation on beneficiary application of knowledge and skills of 2015 learning-related programming, the following recommendations are re-confirmed:

✓ **Programmes should expand opportunities for blended learning, particularly in combing e-Learning with face-to-face interaction.**

- ✓ **Programmes should encourage learners to inform their supervisors of attendance at the beginning of the learning event, and to provide their supervisors with updates as learning progresses and results are achieved.**
- ✓ **Programmes should refine pre-event announcement information to include objectives on the application/use of knowledge and skills to participant workplaces.**
- ✓ **When feasible, programmes should engage in learning-related events that are part of longer duration initiatives.**
- ✓ **Programmes should ensure the integration of ready-to-use tools in learning programmes to facilitate the application of knowledge and skills by beneficiaries at the work place.**

Annex 1 – Survey Deployed

2017 UNITAR Training Follow-up Survey (English)

Dear former UNITAR participant,

Thank you for accepting to provide feedback on your post-training experience.

UNITAR is committed to providing quality training and your participation in this short survey is crucial for continuous quality improvement. We reconfirm that your responses will be treated confidentially and results reported anonymously.

When you are ready to begin, just click on the button below.

We look forward to receiving your feedback!

Planning, Performance and Results Section @ UNITAR

1. Please indicate the thematic area of the training event in which you took part. Multiple responses are possible.*

Agenda 2030 for Sustainable Development

Climate change

Environmental governance/green economy

International law

Local development/decentralized cooperation

Multilateral diplomacy

Peacekeeping

Peacemaking/conflict prevention

Public finance, trade, intellectual property rights

Satellite imagery/geographical information systems (UNOSAT)

Other (please specify)

2. Please indicate the type of event in which you participated.*

Briefing

Course

Fellowship Programme

Seminar

Workshop

Webinar (i.e. web-based seminar)

I don't know

3. Please indicate if the event was delivered:*

Face-to-face (i.e. residential training)

Online (i.e. e-Course or webinar)

A combination of the two (e.g. blending face-to-face with e-Learning)

4. If you recall the title of the event, please indicate it in the text box below (optional):

Evaluation on beneficiary application of knowledge and skills – 2016 learning-related programming

5. How long took the event you participated in?*

1 day or less

2 to 5 days

6 to 10 days

11 to 20 days

More than 20 days

6. Did you complete the event?*

Yes

No

7. How much of the event did you complete?* and **

More than half

About half

Less than half

Other (please specify)

8. As a follow-up to the event, have you transferred or applied any knowledge/skills acquired from the training to your work?* and **

Yes

No

9. Please provide an example of the knowledge/skills area(s) which you have transferred or applied to your work. (Please try to be as specific as possible, indicating what you may have done differently as a result of transferring or applying the knowledge/skills.)*

10. How much of the application of knowledge/skills to your workplace can you attribute directly to the UNITAR training?.*
   o   76-100 per cent
   o   50-75 per cent
   o   26-50 per cent
   o   1-25 per cent
   o   0 per cent

11. Please indicate how frequently you have applied the knowledge/skills to your work.*

Frequently (i.e. on many occasions)

Often

Occasionally

Infrequently (i.e. almost never)

Never

12. How confident are you in transferring or applying the knowledge/skills to your work?*

Fully confident

Very confident

Neutral

Somewhat confident

Not at all confident

13. How important is applying the knowledge/skills acquired in the event to your job success? If you are currently unemployed, please tick 'Not applicable'.*

Fully important

Very important

Neutral

Somewhat important

Not at all important

Not applicable

14. Which of the following factors *enabled* you to apply knowledge/skills from the training (tick as appropriate)?*

Opportunity to apply knowledge/skills

Importance of knowledge/skills to my job success

Support received from my supervisor

Support received from colleagues/peers

Confidence to apply knowledge/skills

Action planning in the training facilitated transfer and application of knowledge/skills

Systems and processes supported the use of knowledge/skills

Other, please specify

15. Did any factors deter you from applying knowledge/skills more often than presently is the case?* and **

Yes

No

16. Which of the following factors deterred you from applying knowledge/skills from the event (tick as appropriate)?*

No opportunity to apply knowledge or skills

Knowledge/skills not important to my job success

Lack of supervisor support

Lack of support from colleagues/peers

Lack of confidence to apply knowledge/skills

Insufficient knowledge/skills to be applied

Lack of time

Application of knowledge and skills not supported by systems and processes

Other, please specify

Finally, UNITAR would like to conclude with four quick questions about you:

17. Which is your professional affiliation?

Academia/university

Government - local

Government - state/provincial

Government - national

Non-governmental organization

Private sector

United Nations - international staff

United Nations - local staff

International organization (non UN)

Evaluation on beneficiary application of knowledge and skills – 2016 learning-related programming

Regional organization

Other (please specify)

18. What is your gender?*

Female

Male

19. Please indicate your nationality or nationalities.*

Annex 3 – INTERVIEW QUESTIONS

Information prior to interview:
- Information will be kept confidential and anonymous.
- We would like to record the interview. Would you agree to that?
- Thank you for having responded to the survey and your availability and agreeing to be interviewed; your feedback is very much appreciated.

Explain goal of probing questions:
- Understanding better participation answers provided, understanding what really changed following the event, going beyond level 1 and 2, seeing where UNITAR can improve/change approach

1. Tell us which training event you attended and when.

2. How long was the event you attended (effective time spent for completing the event)?

3. Did you take the learning event for the sake of learning, or did you decide to sign up with a specific goal to be able to perform e.g. job tasks (what tasks?) better? Why?

4. Could you kindly further explain the factors (mention factors) that enabled you to apply the knowledge/skills to your work and why?

5. You mentioned that you are fully/very/somewhat/not at all confident in applying the knowledge skills. Could you kindly explain what led you to your reply? To what extent is the gained confidence due to the learning/training event? Express your answer in percentage.

6. **Looking back, please compare your current behaviour at work to your behaviour prior to the learning event. What changes in your behaviour have resulted from acquiring new knowledge and skills or strengthening of existing knowledge and skills? Additionally, could you kindly describe what exactly has changed in your job performance (tasks, actions, procedures, steps)?**
   What has changed about you or your work as a result of your participation in this training/learning event?
   How has your organization/employer benefited from your participation in the learning/training event?
   How much % of your working time did you spent on tasks that require knowledge/skills you have obtained through the learning event?

7. Are you still using the gained knowledge/skills now? If so, could you give a specific example of a situation you experienced that illustrates the success/*improvements* (or failure) of the application of the knowledge/skills you acquired through the training?

Isolating effects

8. How much of your improvement at work is due to the attendance of the event? Express your answer in %.

9. Which other factors have also contributed to your changed behaviour at work, if any? Recognizing that other factors could have influenced your improvement, please estimate the percentage of improvement that is attributable to the learning/training event. Express as a percentage out of 100%.
   How confident are you with the response you have given (from 0-100%)?

10. Personalised follow-up question on individual responses if interesting reply.

Annex 5 – INTERVIEW RESULTS

Objective Assessment of Learning?	YES
Email:	███████████████████████
Interviewee:	███████████████████████
Language of the interview:	English
Data/Time (DD/MM/YYYY):	24/07/2017; 15h
Gender:	Female
Sector/Profession:	Private/Public Organization
Did you apply any knowledge/skill?	No
Frequency of application:	N/A
Course format:	e-learning
Course area:	Peacemaking and conflict prevention
Duration:	1 day or less
Certificate?	
Reason for registration:	Needed to fill an UN application
Factors - Enablers:	N/A
Factors - Barriers:	N/A
Confidence in application:	N/A
Confidence related to training event:	N/A
Changes in behavior at job:	N/A
Working time:	N/A
Use over time:	N/A
Isolating factors - improvement learning event:	N/A
Isolating factors - improvement other factors:	N/A
Confidence about answer:	N/A
Isolating factor multiplied with confidence:	N/A
Additional Comment:	Reality: she didn't apply any knowledge because, she only subscribed because it was a condition to apply to a UN job position. However, during her interview, she told us that the course was very interesting, by presenting different concepts of conflict at micro-level. She guesses it is possible to apply this knowledge to manage daily micro-conflicts at the workplaces. She believes that she can use this knowledge in the future if she works in a UN agency/fund.

Evaluation on beneficiary application of knowledge and skills – 2016 learning-related programming

Objective Assessment of Learning?	YES
Email:	███████████████████████████████
Interviewee:	███████████████████████████████
Language of the interview:	English
Data/Time (DD/MM/YYYY):	24/07/2017; 15h30
Gender:	Male
Sector/Profession:	National government
Did you apply any knowledge/skill?	YES
Frequency of application:	Frequently
Course format:	Blended
Course area:	Other (Proposal Writing)
Duration:	6 months
Certificate?	
Reason for registration:	Instead of managing ready projects sended by donors partners, He learned how to write project proposals. His supervisor recommended.
Factors - Enablers:	Supported by his supervisor; by his colleagues; confidence to apply skills.
Factors - Barriers:	
Confidence in application:	Neutral (but, he is much more confident. He wrote two projects already)
Confidence related to training event:	N/A
Changes in behavior at job:	Now, he and his supervisor are able to write proposals by themselves, in order to create demand according their needs.
Working time:	76-100%
Use over time:	Only him and his supervisor are able to write proposals
Isolating factors - improvement learning event:	UNITAR's training was crucial. This skill (write proposals) is only due to the Fellowship.
Isolating factors - improvement other factors:	New tasks, based on this skill: he is elaborating new strategies to control mouse diseases
Confidence about answer:	N/A
Isolating factor multiplied with confidence:	N/A
Additional Comment:	He told us he feels confident to share/disseminate this knowledge with colleagues and his students.

Evaluation on beneficiary application of knowledge and skills – 2016 learning-related programming

Objective Assessment of Learning?	YES
Email:	███████████████████████
Interviewee:	███████████████████████
Language of the interview:	French
Data/Time (DD/MM/YYYY):	24/07/2017; 16h
Gender:	Male
Sector/Profession:	auditor
Did you apply any knowledge/skill?	NO
Frequency of application:	N/A
Course format:	e-learning
Course area:	Agenda 2030 for Sustainable Development
Duration:	more than 20 days
Certificate?	
Reason for registration:	Personal interest
Factors - Enablers:	
Factors - Barriers:	lack of opportunity
Confidence in application:	confidant
Confidence related to training event:	N/A
Changes in behavior at job:	N/A
Working time:	N/A
Use over time:	N/A
Isolating factors - improvement learning event:	N/A
Isolating factors - improvement other factors:	N/A
Confidence about answer:	N/A
Isolating factor multiplied with confidence:	N/A
Additional Comment:	He didn't use the knowledge acquired because he is working in a different area

Evaluation on beneficiary application of knowledge and skills – 2016 learning-related programming

Objective Assessment of Learning?	NO
Email:	████████████████████████████
Interviewee:	████████████████████████████
Language of the interview:	French
Data/Time (DD/MM/YYYY):	24/07/2017; 16h30
Gender:	Female
Sector/Profession:	student
Did you apply any knowledge/skill?	NO
Frequency of application:	N/A
Course format:	Blended
Course area:	Programme Ibtikari
Duration:	5 days
Certificate?	
Reason for registration:	Personal interest
Factors - Enablers:	
Factors - Barriers:	lack of opportunity and lack of time
Confidence in application:	N/A
Confidence related to training event:	N/A
Changes in behavior at job:	N/A
Working time:	N/A
Use over time:	N/A
Isolating factors - improvement learning event:	N/A
Isolating factors - improvement other factors:	N/A
Confidence about answer:	N/A
Isolating factor multiplied with confidence:	N/A
Additional Comment:	She didn't use the knowledge because of her personal context, she is a student so she doesn't have the time. And because it is difficult to find funding

Evaluation on beneficiary application of knowledge and skills – 2016 learning-related programming

Objective Assessment of Learning?	NO
Email:	
Interviewee:	
Language of the interview:	French
Data/Time (DD/MM/YYYY):	07-25; 15h
Gender:	Male
Sector/Profession:	Researcher (macro-economy)
Did you apply any knowledge/skill?	NO
Frequency of application:	N/A
Course format:	e-learning
Course area:	CEDEAO-UE-BMZ-UNITAR cours en ligne sur "L'accord de facilitation des échanges de l'OMC et les règles et réglementations realatives à la facilitations des échangse au niveau régional"
Duration:	4 weeks
Certificate?	
Reason for registration:	Personal interest
Factors - Enablers:	
Factors - Barriers:	lack of opportunity and Application of knowledge and skills not supported by systems and process
Confidence in application:	Confidant if he would have the opportunity
Confidence related to training event:	N/A
Changes in behavior at job:	N/A
Working time:	N/A
Use over time:	N/A
Isolating factors - improvement learning event:	N/A
Isolating factors - improvement other factors:	N/A
Confidence about answer:	N/A
Isolating factor multiplied with confidence:	N/A
Additional Comment:	He would have like to have a community of practice at the end of the training. With for example groups by country, online, with a person who could coach them. That would help them to have more practical experience.

Evaluation on beneficiary application of knowledge and skills – 2016 learning-related programming

Objective Assessment of Learning?	YES
Email:	
Interviewee:	
Language of the interview:	English
Data/Time (DD/MM/YYYY):	25/07/2017; 16h
Gender:	Male
Sector/Profession:	National government
Did you apply any knowledge/skill?	YES
Frequency of application:	Occasionally
Course format:	e-learning
Course area:	Other (Fundamentals of Financial Markets)
Duration:	3 weeks
Certificate?	
Reason for registration:	Personal interest
Factors - Enablers:	
Factors - Barriers:	Few opportunities to apply (it is not the focus of his job)
Confidence in application:	Fully confident
Confidence related to training event:	N/A
Changes in behavior at job:	He hasn't change his behavior because financial market is not the main area in his job.
Working time:	1-25%
Use over time:	
Isolating factors - improvement learning event:	He used this course to complement his PhD studies.
Isolating factors - improvement other factors:	He plans to use this knowledge in the future, even because, according to him, financial markets are still incipient in Uganda. So, in the future, he will be able to manage this issue.
Confidence about answer:	
Isolating factor multiplied with confidence:	
Additional Comment:	He considers the online-course good, even as an introductory course. According to him, the course opened his eyes about financial markets. Meanwhile, he is finishing his PhD and his division is not interested at all in this topic (not yet).

Evaluation on beneficiary application of knowledge and skills – 2016 learning-related programming

Objective Assessment of Learning?	NO
Email:	████████████████████████
Interviewee:	████████████████████████
Language of the interview:	English
Data/Time (DD/MM/YYYY):	25/07/2017; 17h
Gender:	Female
Sector/Profession:	Academia/university
Did you apply any knowledge/skill?	YES
Frequency of application:	Frequently
Course format:	Face-to-face
Course area:	Other (World Heritage Nominations)
Duration:	1 week
Certificate?	
Reason for registration:	Personal interest/Her area
Factors - Enablers:	Opportunity to apply (consultant and professor); job success; confidence to apply
Factors - Barriers:	
Confidence in application:	Very confident
Confidence related to training event:	
Changes in behavior at job:	As consultant/professor, she is always looking for new techniques and trends. After the course, she got the confidence to work in different sectors and continents, both related to heritage. Now, she is more requested to be in missions and her reports are more consistent.
Working time:	26-50%
Use over time:	Frequently, because her knowledge is interconnected.
Isolating factors - improvement learning event:	She acquired knowledge in a different way; she expanded her network; she has disseminated her knowledge with students
Isolating factors - improvement other factors:	
Confidence about answer:	
Isolating factor multiplied with confidence:	
Additional Comment:	She is consultant and professor. It means she needs to be updated with the lastest issues and open to apply these skills in her workplaces. She figured out the course by herself.

Evaluation on beneficiary application of knowledge and skills – 2016 learning-related programming

Objective Assessment of Learning?	NO
Email:	███████████████████████████████
Interviewee:	███████████████████████████████
Language of the interview:	French
Data/Time (DD/MM/YYYY):	26/07/2017; 12h30
Gender:	Male
Sector/Profession:	Student
Did you apply any knowledge/skill?	NO
Frequency of application:	N/A
Course format:	e-learning
Course area:	CEDEAO-UE-BMZ-UNITAR cours en ligne sur "L'accord de facilitation des échanges de l'OMC et les règles et réglementations realatives à la facilitations des échangse au niveau régional"
Duration:	5 weeks
Certificate?	
Reason for registration:	He was studying that and a teacher recommended the training
Factors - Enablers:	
Factors - Barriers:	Lack of opportunity
Confidence in application:	Confidant, already for his study he could apply some knowledge
Confidence related to training event:	N/A
Changes in behavior at job:	N/A
Working time:	N/A
Use over time:	N/A
Isolating factors - improvement learning event:	N/A
Isolating factors - improvement other factors:	N/A
Confidence about answer:	N/A
Isolating factor multiplied with confidence:	N/A
Additional Comment:	For his first trainnig, it was good to have case study, and the panel was really good (high reputation). For the second training also. He has done some networking and met other students from this training in Paris.

Evaluation on beneficiary application of knowledge and skills – 2016 learning-related programming

Objective Assessment of Learning?	NO
Email:	
Interviewee:	
Language of the interview:	English
Data/Time (DD/MM/YYYY):	26/07/2017; 15h
Gender:	Female
Sector/Profession:	Academia/university
Did you apply any knowledge/skill?	YES
Frequency of application:	Frequently
Course format:	Face-to-face
Course area:	Green Economy Academy and training of trainers for an Inclusive Green Economy
Duration:	10 to 20 days
Certificate?	
Reason for registration:	Personal interest
Factors - Enablers:	She works at the university, so the Institute provided some conditions for her, by adapting systems and processes to enable the use of skills
Factors - Barriers:	
Confidence in application:	Very confident
Confidence related to training event:	N/A
Changes in behavior at job:	Yes. Now she is able to disseminate her knowledge in a better way, e.g. increasing the quality of materials.
Working time:	1-25%
Use over time:	Yes
Isolating factors - improvement learning event:	N/A
Isolating factors - improvement other factors:	N/A
Confidence about answer:	N/A
Isolating factor multiplied with confidence:	N/A
Additional Comment:	She feels confident to use this knowledge in the future because she has a passion for sustainable development. So, she wants to explore more issues on green economy. In addition, she contributed to the development of Strategy led by the Ministry of Environment of Ghana.

Evaluation on beneficiary application of knowledge and skills – 2016 learning-related programming

Objective Assessment of Learning?	NO
Email:	████████████████
Interviewee:	████████████████
Language of the interview:	English
Data/Time (DD/MM/YYYY):	08-10; 14h30
Gender:	Male
Sector/Profession:	NGO manager
Did you apply any knowledge/skill?	YES
Frequency of application:	Frequently
Course format:	face-to-face
Course area:	Developing climate change adaptation and disaster risk reduction in the Asia Pacific Region
Duration:	4 days
Certificate?	-
Reason for registration:	Personal Interest; Opportunity to update his know-how
Factors - Enablers:	opportunity to apply; confidence to apply; action planning; systems and processes
Factors - Barriers:	no
Confidence in application:	fully confident
Confidence related to training event:	He highlighted that the event was very important by bringing know-how on the ground in order to update everyone about disaster risk reduction.
Changes in behavior at job:	He mentioned that his new tasks are more coincidence than consequence for taking the event. Indeed, training reinforced what he already knew - improved the way he addresses problems.
Working time:	50-75%
Use over time:	it is going to take a long time because he works raising awareness and disseminating knowledge among persons with disability, to know how to protect themselves (resilience) against natural disasters.
Isolating factors - improvement learning event:	It is not his main task. It may helped his profile, but this knowledge just contributed marginally in his career.
Isolating factors - improvement other factors:	Event explains 50% of his improvement at work
Confidence about answer:	
Isolating factor multiplied with confidence:	
Additional Comment:	

Evaluation on beneficiary application of knowledge and skills – 2016 learning-related programming

Objective Assessment of Learning?	YES
Email:	███████████████████████████

Email:	███████████████████████████████
Interviewee:	███████████████████████████████
Language of the interview:	French
Data/Time (DD/MM/YYYY):	08-14; 14h30
Gender:	Male
Sector/Profession:	Government - national
Did you apply any knowledge/skill?	YES
Frequency of application:	Frequently
Course format:	e-learning
Course area:	L'accord de facilitation des échanges de l'OMC et les règles et réglementations relatives à la facilitation des échanges au niveau régional.
Duration:	5 weeks
Certificate?	yes
Reason for registration:	job success
Factors - Enablers:	opportunity to apply
Factors - Barriers:	NA
Confidence in application:	very confident
Confidence related to training event:	
Changes in behavior at job:	He used the knowledge to pass a competitive exam
Working time:	50-75%
Use over time:	Yes, it can help for a future job (to progress in his career)
Isolating factors - improvement learning event:	70-80%
Isolating factors - improvement other factors:	
Confidence about answer:	
Isolating factor multiplied with confidence:	
Additional Comment:	He used the knowledge to pass a competitive exam, but in his work they organise consultation with the population, and there he can use this acquired knowledge too.

Evaluation on beneficiary application of knowledge and skills – 2016 learning-related programming

Objective Assessment of Learning?	YES
Email:	
Interviewee:	
Language of the interview:	French
Data/Time (DD/MM/YYYY):	08-15; 10h00
Gender:	Female
Sector/Profession:	Government - national
Did you apply any knowledge/skill?	YES
Frequency of application:	Always
Course format:	e-learning
Course area:	International Masters in Conflictology
Duration:	-
Certificate?	-
Reason for registration:	After a first training of Unitar, Gender Leadership, she chose to follow this one
Factors - Enablers:	systems and processes
Factors - Barriers:	no
Confidence in application:	very confident
Confidence related to training event:	NA
Changes in behavior at job:	She changes her behavior at her work (she analyses more carefully both sides), and she has developped compentencies for her ONG
Working time:	26-50%
Use over time:	Yes
Isolating factors - improvement learning event:	70%
Isolating factors - improvement other factors:	30%
Confidence about answer:	
Isolating factor multiplied with confidence:	
Additional Comment:	The modules and their links are well made, the same for the learning material that she keps using even after the end. The exchanges on the forum was really important for her in order to see different point of view.

Evaluation on beneficiary application of knowledge and skills – 2016 learning-related programming

Objective Assessment of Learning?	NO
Email:	███████████████████████
Interviewee:	███████████████████████
Language of the interview:	French
Data/Time (DD/MM/YYYY):	08-16; 18h00
Gender:	Male
Sector/Profession:	Government - national
Did you apply any knowledge/skill?	YES
Frequency of application:	Frequently
Course format:	e-learning
Course area:	L'accord de facilitation des échanges de l'OMC et les règles et réglementations relatives à la facilitation des échanges au niveau régional.
Duration:	4 weeks
Certificate?	yes
Reason for registration:	Personal interest and job success
Factors - Enablers:	Action planning in the training facilitated transfer and application of knowledge/skills
Factors - Barriers:	NA
Confidence in application:	very confident
Confidence related to training event:	NA
Changes in behavior at job:	He changes his behavior at his work, he can understand better technical rapport and he can explain the important aspect to his colleagues
Working time:	50-75%
Use over time:	Yes
Isolating factors - improvement learning event:	85-90%
Isolating factors - improvement other factors:	
Confidence about answer:	
Isolating factor multiplied with confidence:	
Additional Comment:	Concrete example and case studies is what really helped him. For him the formation should be longer to have more discussion and more practical case. In his other formation, he wasn't convince by the only one week discussion (according to him, it was a mess in the answers and it is not enough to develop a conversation.

Evaluation on beneficiary application of knowledge and skills – 2016 learning-related programming

Objective Assessment of Learning?	NO
Email:	███████████████████████████
Interviewee:	███████████████████████████
Language of the interview:	English
Data/Time (DD/MM/YYYY):	08-16; 14h
Gender:	Female
Sector/Profession:	NGO manager
Did you apply any knowledge/skill?	YES
Frequency of application:	Always
Course format:	face-to-face
Course area:	Training Workshop of Human Security: Identification, Assistance and Sustainable Protection of victims of human trafficking
Duration:	2 weeks
Certificate?	yes
Reason for registration:	Personal interest to acquire new skills in human trafficking
Factors - Enablers:	sytems and processes; confidence to apply; supported by her colleagues and supervisor; importance of knowledge to her job success; opportunity to apply
Factors - Barriers:	NA
Confidence in application:	Fully confident
Confidence related to training event:	She got confidence enough to share this new skills with her colleagues.
Changes in behavior at job:	She kept her common role by working with local partners in child protection. However, she got a special attention on human trafficking.
Working time:	76-100%
Use over time:	She plans to keep using these skills for a long time.
Isolating factors - improvement learning event:	That was her first course on human trafficking. According to her, 30%-40% of the UNITAR's content is applied into the project.
Isolating factors - improvement other factors:	
Confidence about answer:	
Isolating factor multiplied with confidence:	
Additional Comment:	She works in a NGO, so she has support from supervisor and colleagues to apply skills on human trafficking, a subtopic of the NGO (child protection). She has used these new skills to disseminate content among local partners and member communities, to raise awareness and to promote network among local and national officers working in this topic.
