## Summary

1. What is the PRTR-España Register?
2. Background
3. Legal Framework
4. How PRTR-España works
5. Functionalities for Facilities, Competent Authorities and System Administrator
6. Presentation of PRTR data to the public
7. Who uses PRTR Register and for what?
8. Capacity Building and Awareness Activities

# 1.- What is the PRTR-España Register

# What's PRTR-España?

**PRTR-España** is the *Spanish Register of Emissions and Pollutant Sources*, which provides information on the pollutant emissions to air, water and land, and off-site transfer of wastes from the main industrial facilities.

PRTR-España gives to the public all the information validated by the Competent Authorities, following the criteria of the *European Regulation 166/2006 (E-PRTR)* and the *Real Decreto 508/2007* when the emission values are above the established thresholds.

*PRTR-España, since 2007, is actually the continuation of the former EPER-España Register which covered the information on emissions to air and water from the IPPC industrial activities. All EPER data (2001 to 2006) have been incorporated in PRTR-España*

All the process is on the Internet: [www.prtr-es.es](http://www.prtr-es.es)

## 2.- Background

**“Implementation of Pollutant Release and Transfer Registers (PRTR) as a tool for Persistent Organic Pollutants (POP) reporting, dissemination and awareness raising. INCEPTION WORKSHOP. 27 November 2015. Madrid. Spain.**

# At the begining...

**Informatic application**

**Website**

**www.prtr-es.es**

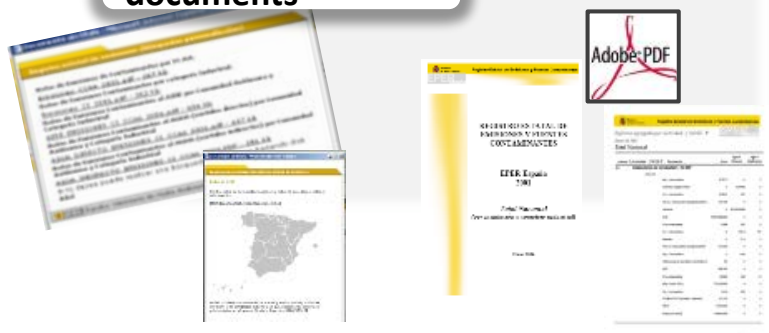

**“Implementation of Pollutant Release and Transfer Registers (PRTR) as a tool for Persistent Organic Pollutants (POP) reporting, dissemination and awareness raising. INCEPTION WORKSHOP. 27 November 2015. Madrid. Spain.**

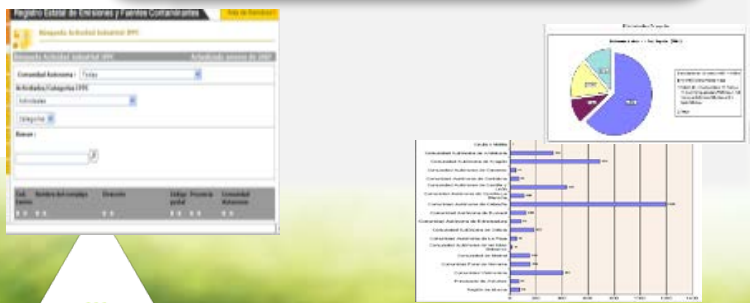

# At the begining...

## EPER-España

Information in PDF documents

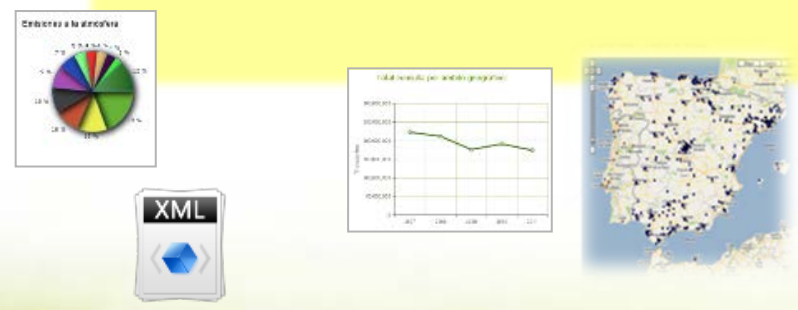

Search options on line and  
A few Downloads possible but only in Excel format.

**“Implementation of Pollutant Release and Transfer Registers (PRTR) as a tool for Persistent Organic Pollutants (POP) reporting, dissemination and awareness raising. INCEPTION WORKSHOP. 27 November 2015. Madrid. Spain.**

# Legal Background (1)

## A bit of history of emission registers in the EU...(1)

“Implementation of Pollutant Release and Transfer Registers (PRTR) as a tool for Persistent Organic Pollutants (POP) reporting, dissemination and awareness raising. INCEPTION WORKSHOP. 27 November 2015. Madrid. Spain.

## Legal Background (2)

## A bit of history of emission registers in the EU...(2)

# EPER

Only IPPC facilities from 56 industrial activities

50 pollutants

Emissions to air and water

Reporting each 3 years (2001 & 2004)

PRTR Protocol

# PRTR

IPPC + PRTR facilities from 65 industrial activities

86 pollutants

Emissions to air, water, land; accidental and diffuse sources

Off-site transfers of waste

Reporting yearly basis (from 2007)

## Legal Background (3)

A bit of history of emission registers in the EU...(3)

In EU...

**E-EPER**

**50** pollutants

**56** Industrial activities

**air** and **water** releases above thresholds

Reporting **each 3 year**

**E-PRTR**

**91** pollutants

**65** activities

**Air, water, land and accidental** releases above thresholds

**Diffuse sources**

**off-site transfers of wastes**

**Yearly basis reporting**

**Methods of M,C,E**

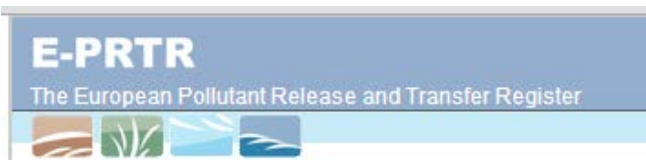

In UE...

But in Spain, since EPER...

- All emission data
- Reporting on yearly basis
- Methods of M,C,E
- Other information (RBDs..)

## Scopes in the EU and in Spain

**65** Industrial activity categories

**73 industrial activities** (some specific categories added in Spain)

**91** Pollutants

**115 pollutants:**  
 - **Air:** TSP, Ta, Sb, V, Co, Mn, TOC to the air  
 - **Water:** disaggregated information for groups of substances (PAHs, xylenes, DDT, brominated diphenylethers)

**Only** emission data above thresholds

**All** emission data (E-PRTR thresholds used to make data available to the public)

**Less** level of information:  
 - **Water:** direct/indirect  
 - **Wastes:** hazardous/non hazardous  
 - **Industrial activity:** for example, chemical industry has just 6 sub-activities.

**More** level of information:  
 - **Water:** sewage treatment plant, coastal, river...  
 - **Wastes:** European waste codes (EWC), treatment operation (R and D), hazardous/non hazardous ...  
 - **Industrial activity:** for example, chemical industry splitted into 22 sub-activities.

**“Implementation of Pollutant Release and Transfer Registers (PRTR) as a tool for Persistent Organic Pollutants (POP) reporting, dissemination and awareness raising. INCEPTION WORKSHOP.  
 27 November 2015. Madrid. Spain.**

## 3.- Legal Framework

**“Implementation of Pollutant Release and Transfer Registers (PRTR) as a tool for Persistent Organic Pollutants (POP) reporting, dissemination and awareness raising. INCEPTION WORKSHOP.  
27 November 2015. Madrid. Spain.**

# Legal Framework (1)

## INTERNATIONAL

Adoption of the **PRTR Protocol** - Aarhus Convention Kiev, May 2003, 21<sup>st</sup>.  
It came into force the **8th October 2009**. Spain is Party of it, since September 2009.

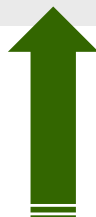

## EUROPE

**Regulation 166/2006** regarding the establishment of an European Pollutant Release and Transfer Register. (E-PRTR)

## SPAIN

**Real Decreto 508/2007**, regarding the information which has to be Provided to the Spanish PRTR and its amendments through the **Real Decreto 815/2013 (IED transposition)**.

“Implementation of Pollutant Release and Transfer Registers (PRTR) as a tool for Persistent Organic Pollutants (POP) reporting, dissemination and awareness raising. INCEPTION WORKSHOP. 27 November 2015. Madrid. Spain.

## Legal Framework (2)

### Reasonings for RD 508/2007

**Increase coherence** with other environmental Registers

**Clarify the scope** for PRTR facilities that were not included in previous EPER Register. (**Annex I:** industrial activities categories; **Annex II:** substances/pollutants to be reported; **Annex III:** data and formats)

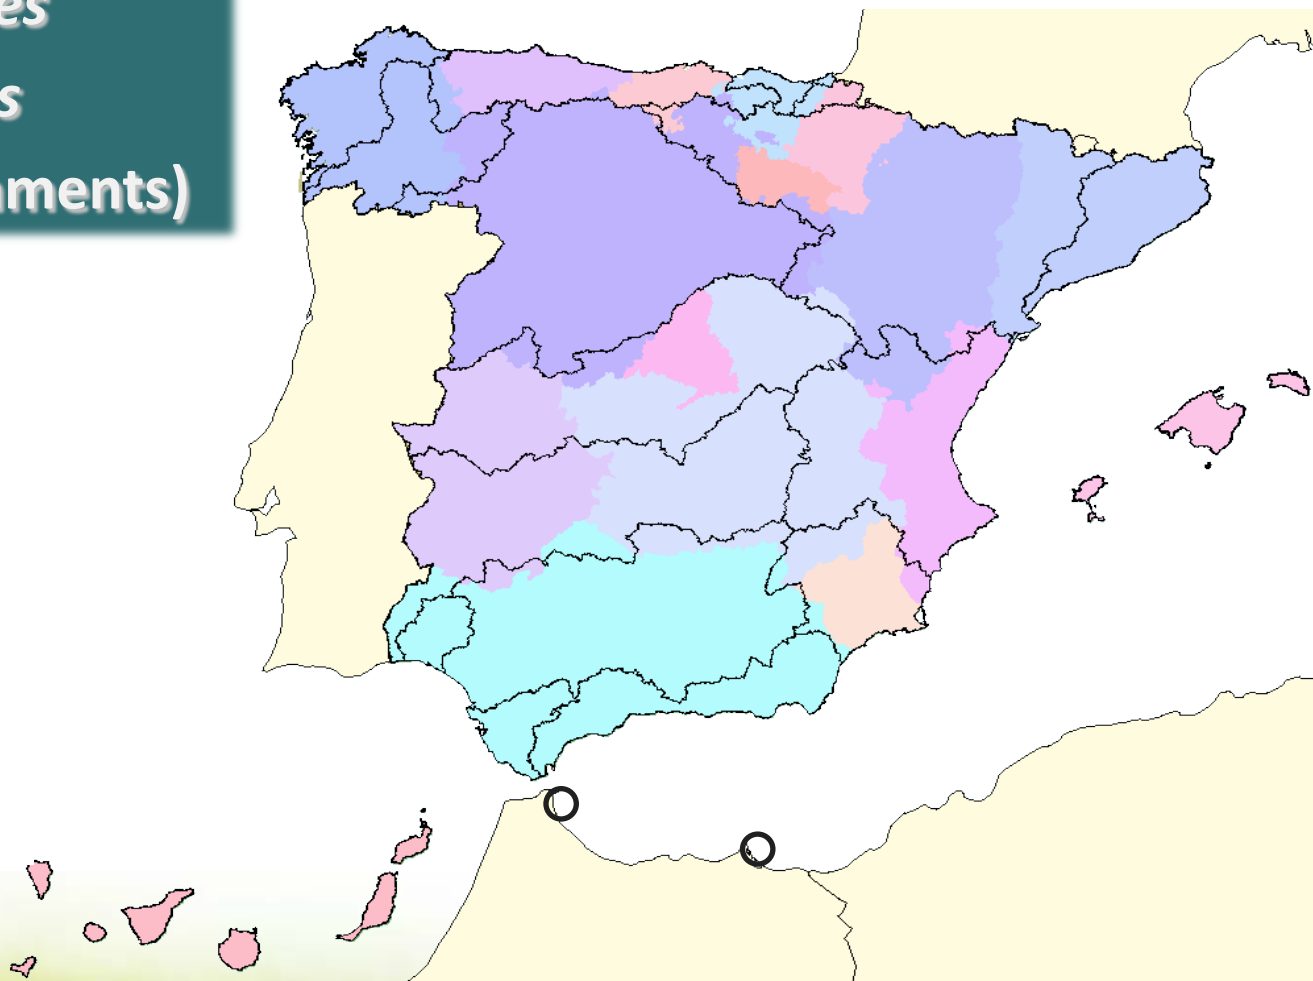

**Avoid gaps** of information in the transition from EPER-España to PRTR-España

**New legislation in Spain: new scopes, more facilities, more requirements:  
*Real Decreto 815/2013, which amends the RD 508/2007***

# Comunidades Autónomas (Regional Governments)

## Competent Authorities (1)

- Comunidades autónomas**

# Competent Authorities (2)

## River Basis Districts (*"Demarcaciones hidrográficas"*)

**"Implementation of Pollutant Release and Transfer Registers (PRTR) as a tool for Persistent Organic Pollutants (POP) reporting, dissemination and awareness raising. INCEPTION WORKSHOP. 27 November 2015. Madrid. Spain.**

## 4.- How PRTR-España works

**“Implementation of Pollutant Release and Transfer Registers (PRTR) as a tool for Persistent Organic Pollutants (POP) reporting, dissemination and awareness raising. INCEPTION WORKSHOP. 27 November 2015. Madrid. Spain.**

## How PRTR-España works (1)

**PRTR-España** is designed as an integrated tool for gathering, management and dissemination of data, located in the Internet, taking into account the Spanish legal competencial.

This integrated electronic tool is structured in two levels of access with different functionalities: **MEMBER AREA** and **PUBLIC INFORMATION**.

## Who are “members”

**FACILITIES (owners/operators):** registration, notification and queries

**COMPETENT AUTHORITIES :** revision, validation, upload and data management; **Autonomous Communities (ACs), River Basin District (RBDs).**

**OTHER AUTHORITIES:** water, wastes, air quality, ETS, national inventories and statistical, etc.

**SYSTEM ADMINISTRATOR** (management, public information, int. requirement, hosting maintenance):  
**Ministry.**

# How PRTR-España works (2)

[www.prtr-es.es](http://www.prtr-es.es)

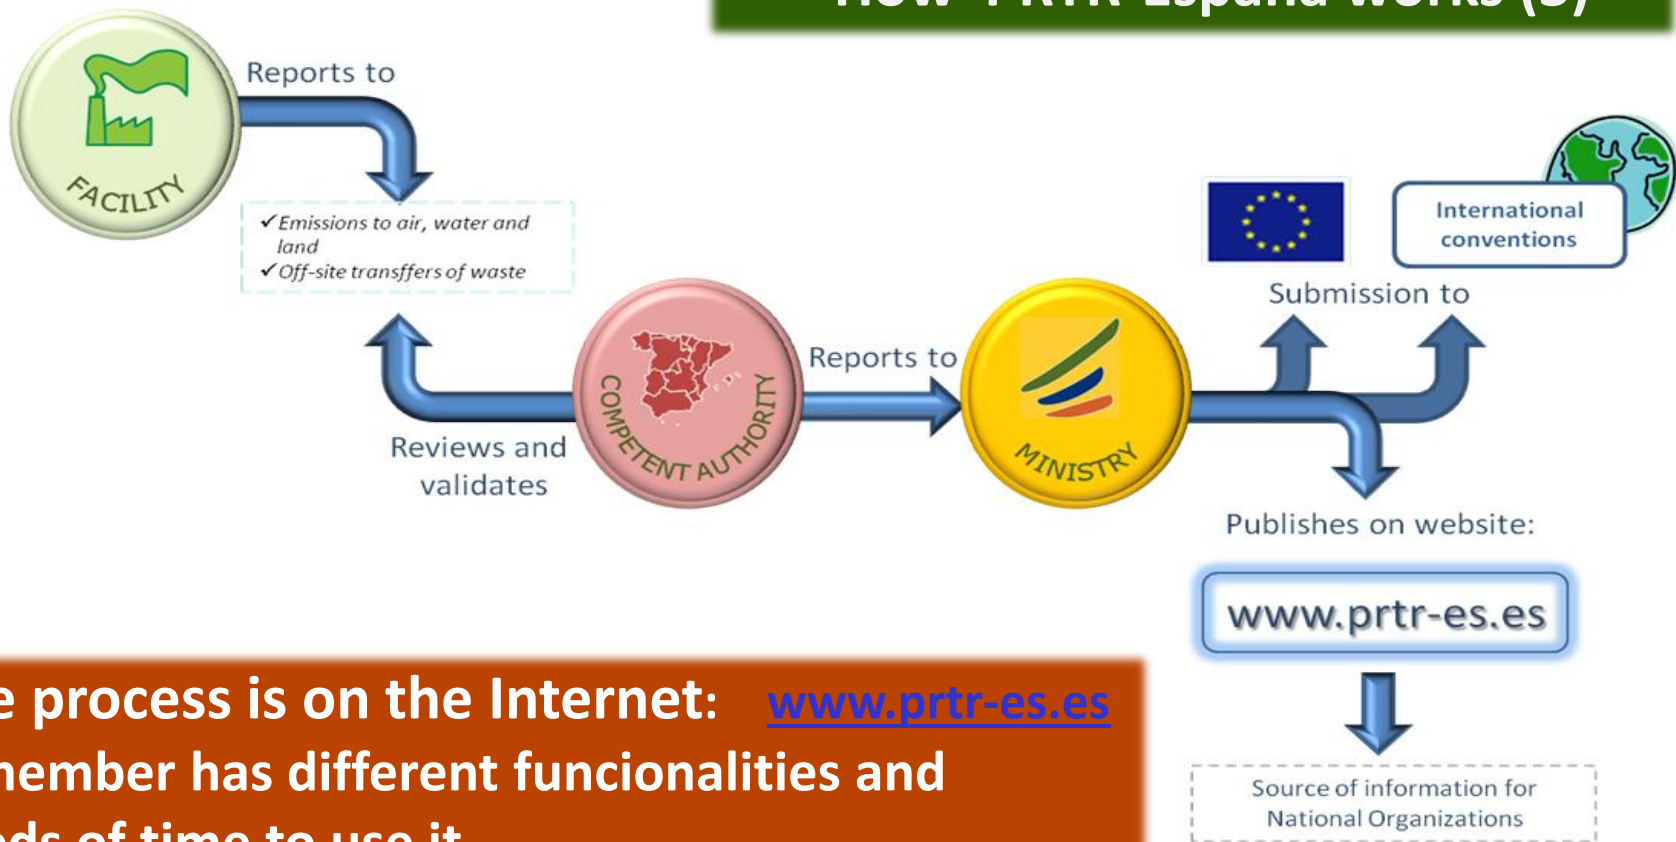

**Member area (data management):**  
facilities,  
Competent Authorities  
and Ministry.

**Public website**  
Access to public data  
and other information  
to the Public in  
general  
and Stakeholders

“Implementation of Pollutant Release and Transfer Registers (PRTR) as a tool for Persistent Organic Pollutants (POP) reporting, dissemination and awareness raising. INCEPTION WORKSHOP. 27 November 2015. Madrid. Spain.

# How PRTR-España works (3)

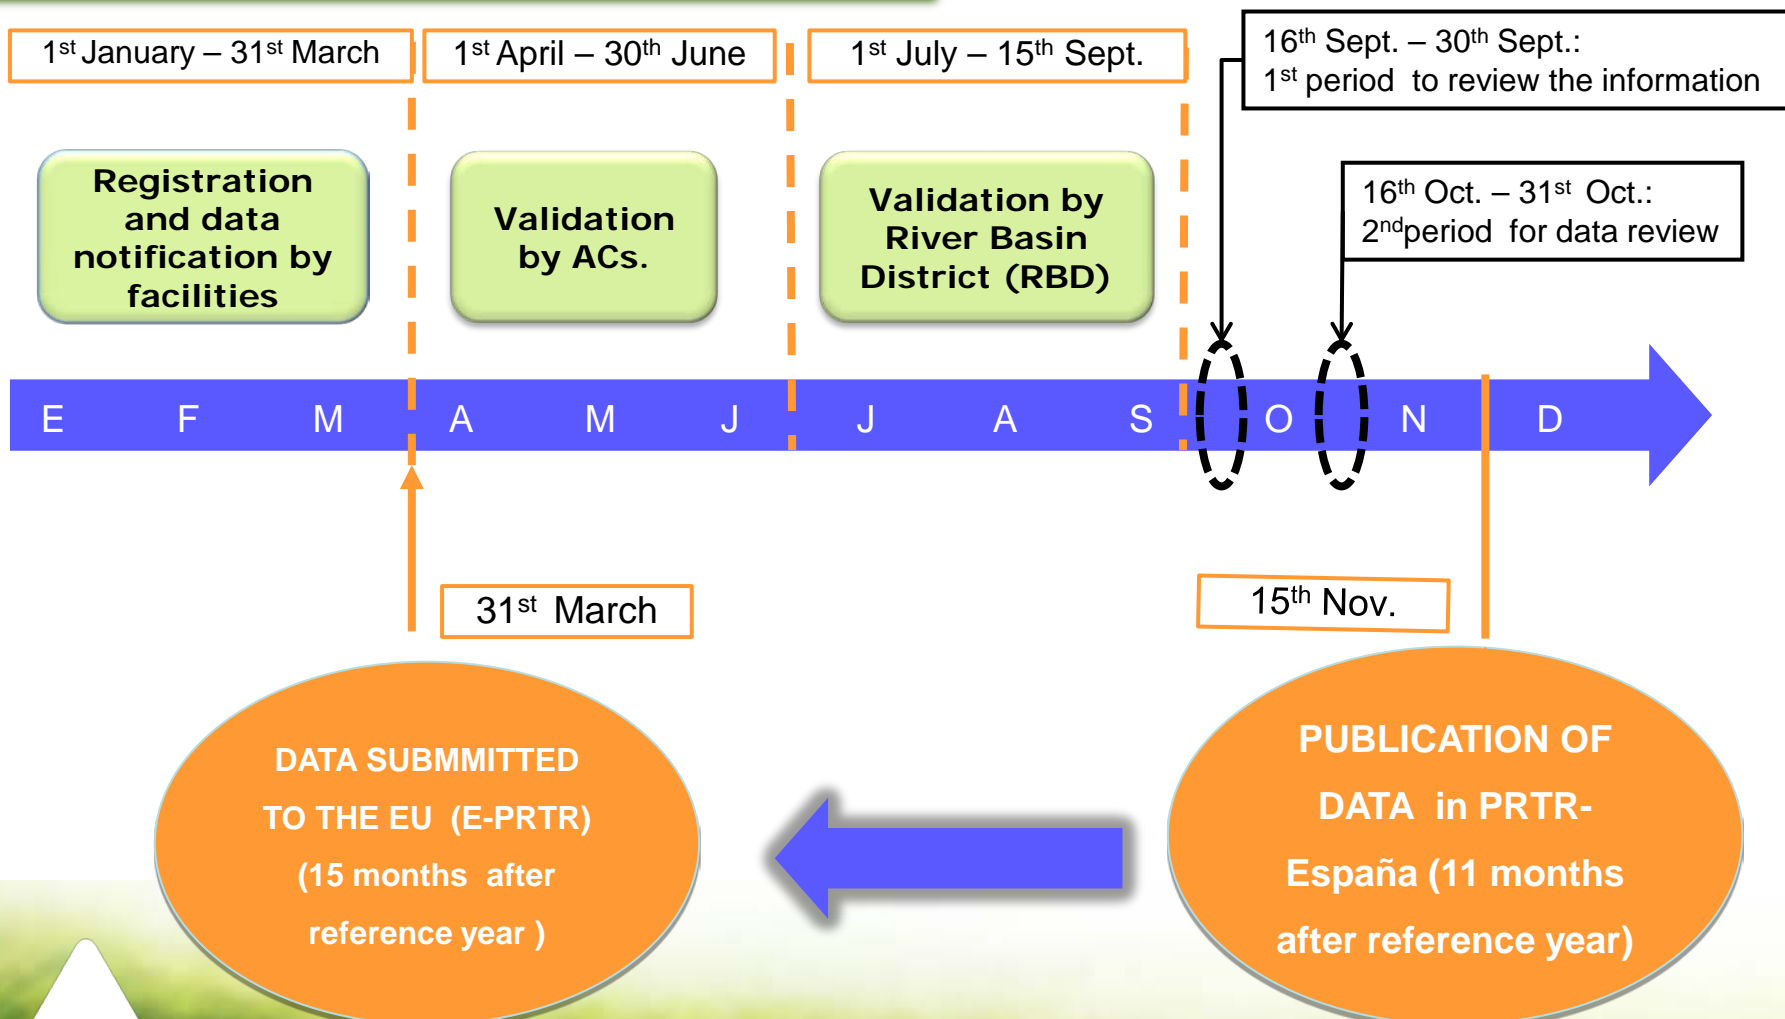

All the process is on the Internet: [www.prtr-es.es](http://www.prtr-es.es)  
 Each member has different functionalities and periods of time to use it

“Implementation of Pollutant Release and Transfer Registers (PRTR) as a tool for Persistent Organic Pollutants (POP) reporting, dissemination and awareness raising. INCEPTION WORKSHOP. 27 November 2015. Madrid. Spain.

## How PRTR-España works (4)

## Annual PRTR cycle

DATA SUBMITTED TO THE EU (E-PRTR)  
(15 months after reference year)

PUBLICATION OF DATA in PRTR-España  
(11 months after reference year)

“Implementation of Pollutant Release and Transfer Registers (PRTR) as a tool for Persistent Organic Pollutants (POP) reporting, dissemination and awareness raising. INCEPTION WORKSHOP. 27 November 2015. Madrid. Spain.

## 5.- Functionalities for Facilities, Competent Authorities and System Administrator

# PRTR-España Functionalities (1)

## 6.- Presentation of PRTR data to the public

[www.prtr-es.es](http://www.prtr-es.es)

<http://www.en.prtr-es.es/>

# Presentation of PRTR data to the public (1)

Public information available in English. Not menu but full information

The screenshot shows the PRTR España website interface. At the top, there are logos for the Spanish Government and the Ministry of Agriculture, Food, and Environment, along with the PRTR España logo and the text 'Registro Estatal de Emisiones y Fuentes Contaminantes'. A search bar and a 'ÁREA DE MIEMBROS' button are also visible. Below the header is a main navigation menu with options: Home, Public information, Facility inventory, Downloads, Documents, and Know more. A sub-menu for 'Public information' is open, showing 'Information from point sources' (selected), 'Data at Facility level', 'Pollutant releases', 'Releases by industrial activities', 'Waste transfers', 'Waste transfers by industrial activity', 'Time series', and 'Map search'. A secondary sub-menu for 'Information from point sources' is also open, listing 'Industrial facilities', 'Pollutant releases' (highlighted), and 'Waste transfers'. The main content area features a 'NEWS' section with a calendar for 'Abril - 30 junio' and '1 julio - 15 sept', and a 'Validation' section for '3/22/2013 Periodo de validación de datos 2012'. There is also an 'INFORMATION' section with contact details: 'From Monday to Friday 9:00 am - 3:00 pm (+34) 902 54 53 50'. A 'SUGGESTIONS' section asks for user input, and a 'TWITTER' section shows tweets from 'PRTR España'.

# Who uses PRTR-España (1). (Number of visitors to PRTR-España public web site)

PRTR ESPAÑA

PRTR-España is the *Spanish Register of Emissions and Pollutant Sources*. It provides information to the public on the pollutant releases to air, water and land, and off-site transfers of wastes not only from the main industrial facilities but also emissions from other point and diffuse sources, according to the international (Kiev Protocol and Aarhus Convention), European (E-PRTR Regulation) and Spanish regulation (*Real Decreto 508/2007* and its amendments). Information is available by facility and in aggregated way by industrial activity, pollutants and geographically.
