ABOUT CLIMATE CHANGE

SUPPORTING
AGENDA
2030

AND MAKING OUR WORLD

HOW DO WE DO IT?

Face-to-face Learning

We develop and deliver tailor-made events based on needs assessments to policy makers, negotiators, planners, managers and educators in our partner countries.

e-Learning

We have long-standing expertise in the design and delivery of high-quality interactive e-learning, from short e-tutorials to more intensive moderated trainings and MOOCs.

Country Support

We build partner country capacities in applying strategic approaches to education and training, linked to national development outcomes.

National Training Institutions

We work with national training institutions so that these can become service providers for cost effective training and skills development on climate change in the long term.

Knowledge-sharing

We help to guide our partners towards knowledge sources that are useful for them, facilitating North-South-South problem analysis and solutions.

Our work areas

- International climate negotiations
- Climate change learning strategies
- Climate change education
- National adaptation planning
- REDD+
- Nationally determined contributions
- Capacity development for training institutions
- Renewable energy and energy efficiency
- Climate policy and public finance
- Green Economy
- SCP

KEY ACHIEVEMENTS

More than 50 international organizations and countries joining together to strengthen climate change learning in developing countries through the One UN Climate Change Learning Partnership (UN CC:Learn).

A full package of adult learning methods and materials for climate change ready to be tailored to national context (Climate Science, Climate Policy, REDD+, Adaptation Planning, Health, Cities, Public Finance, Negotiations, Women's Leadership, Green Development).

Tens of thousands of learners taking part in a free online introductory course on climate change which has become the UN's primary distance-based learning product actively used by all 196 Member States of the UNFCCC.

RESULTS

1

New skills put to work by public sector officials

2

Visible reforms in national education systems

3

Higher standards in the delivery of adult learning among our partners

4

National training institutions better equipped to help countries reach their climate and development goals

SO, WHAT DO YOU THINK
